

Natural Resources Conservation Service
Supplement to Conservation Practice Standard
Pest Management
(Acre)
Code 595

This supplement contains additional criteria for pest management for precision agriculture.

At least one pesticide application has been made with a vehicle equipped with GPS-enabled guidance.

Certification Requirements

1. Precision agriculture equipment for GPS-enabled navigation must be installed on the predominant pesticide application equipment.
2. Pest Management plan developed by NRCS or TSP that meets requirements set forth by the Florida NRCS Pest Management Standard (i.e. WIN-PST evaluation to minimize environmental risk)
3. Pesticide application records and when available geo-referenced as-applied maps must be supplied to the NRCS field office for certification. Maps may be supplied in hardcopy or electronic form (shapefile (.shp) or Rich Text Format (RTF)). Maps will include field boundaries, product applied, rate and date applied and a map legend.
