**660 - Tree/Shrub Pruning  
Implementation Requirements**

**The Practice Purpose(s):**

- Maintain or improve plant productivity, health and vigor, and/or reduce excessive plant pest pressure.
- Develop desired plant structure, foliage or branching density, or rooting length.
- Improve composition and vigor of understory plants.
- Maintain or improve soil quality and and organic matter content.
- Reduce wildfire and/or safety hazards.
- Reduce energy use during field operations.

| <i>Field No.</i> | <i>Acres</i> | <i>Species</i> | <i>No. Trees/Shrubs Treated per Acre</i> | <i>Minimum Amount to Be Removed, %</i> | <i>Maximum Amount to Be Removed, %</i> | <i>Time of Year Pruning Operation Performed</i> |
|------------------|--------------|----------------|--|--|--|---|
|                  |              |                |  |  |  |   |
|                  |              |                |  |  |  |   |
|                  |              |                |  |  |  |   |
|                  |              |                |  |  |  |   |
|                  |              |                |  |  |  |   |
|                  |              |                |  |  |  |   |
|                  |              |                |  |  |  |   |

*Mitigating measures to reduce wildfire hazard or potential for disease and insect pests:*

**OPERATION AND MAINTENANCE**

- Periodically inspect plant condition and conduct additional treatment or mitigation if needed.
- Control local invasive and noxious plants that may establish due to increased light penetration.
