645	<b>Upland Wildlife Habitat Management</b> - Cost-sharing on this practice will be used only for creating or manipulating habitat, not just for retaining. <b>Restricted to the acreage where treatment is applied. CANNOT use 645 and other duplicate practices for same treatment area (i.e. Cannot cost-share 338 - Prescribed Burning and 645 - Upland Wildlife Habitat Management for burning).</b>	Acre	1.00	AC	75%	\$50.00	\$37.50
	<i>See Species List for Wildlife Plantings in Florida for approved plant species.</i>						
	<i>Creating Forest Openings (see Code 460 - Land Clearing.) (Within forest stands: 1-3 acre in size, ≥ 150' wide and, ≤ 5% of forest stand area.) (To create transition zones between forest stands: minimum of 40 feet wide)</i>						
	<i>Food Plots should be 1/4 to 3 acre in size, no more than 1 acre per 25 acres of enrolled land. Non-reseeding annuals (e.g., millet, corn, small grains, etc.) can be used, but not cost-shared.</i>

2/-Cost-sharing limited to perennial strips with at least 3 years life span.

3/-Cost-share on the same acreage no more than once for forest site preparation; for habitat manipulation no more than twice during a 5 year contract and no more than three times for contracts longer than 5 years.

4/-Mast producing hardwoods should be emphasized; longleaf (at <500 trees per acre) and South Florida slash (at <300 trees per acre) are the only pines that can be cost-shared. Pine planting plans must include, as a required item, some habitat manipulation (burning, mowing, disking, etc.) on a 1 to 4 year cycle after planting. This manipulation is needed to ensure development and maintenance of desired wildlife habitat.

5/-Cost-sharing plants limited to those on Species List Approved for Wildlife Plantings in Florida.
