

Source Data for the Official Soil Survey

Fulton County

The traditional final product of first generation soil survey mapping has been the soil survey publication. Each publication included soil map unit descriptions, series descriptions, tables of information (attributes), and maps.

The soil survey of Fulton County was published in 1958. An historical replica of the 1958 soil survey of Fulton County is available through the [Web Soil Survey](#).

An update of this survey was completed in 2007. An updated manuscript for the Fulton County soil survey was published in 2008. The manuscript is available through the [Web Soil Survey](#).

This soil survey has been digitized. Soil maps and associated attribute data are available through the [Web Soil Survey](#).

The official copy of the soil maps (spatial data) for this survey is the certified Soil Survey Geographic (SSURGO) database as delivered through the [Soil Data Mart](#).

The official source of soils data (attributes) for this soil survey area is the National Soils Information System (NASIS) database as delivered through the [Soil Data Mart](#).

A database containing the soils information can be downloaded from the [Soil Data Mart](#). Web based reports are also available.

Information about this soil survey and the availability of maps can be obtained by contacting the local NRCS field office. Contact information for the local NRCS field office can be found at the [USDA Office Information Locator](#).
