OPERATION AND MAINTENANCE ITEMS

The life of this practice can be assured and usually increased by developing and carrying out a systematic operation and maintenance program. Operation and Maintenance (O & M) is necessary for all conservation practices and is required for all practices installed with NRCS assistance. The land user is responsible for proper O & M throughout the life of the practice and as may be required by federal, state, or local laws or regulations. Estimated life span of this installation is at least 15 years.

This practice will require periodic maintenance and may also require operational items to maintain satisfactory performance. Your operation and maintenance program requirements include:

- Maintain all gutters and downspouts free from foreign material that reduces their ability to function.
- Maintain all fasteners to securely hold all gutters and downspouts in place.
- Maintain all underground conveyance lines free from debris and obstructions.
- Maintain all screens and strainers in place and in good working condition.
- Maintain all gutters and downspouts in good working condition and promptly repair if damaged.
- Remove any trees or branches that deposit debris and reduce the capacity of the system.
- Maintain all gutters and downspouts free from foreign material that reduces their ability to function.
- Inspect area below discharge of downspouts for erosion and repair, if needed.

Additional Operation and Maintenance Requirements Specific to this Plan: _____
