

Iowa Field Office Technical Guide - Section II - Special Environmental Concerns

3. Coastal Zone Management Area

Iowa has no CZMAs.

For additional information on this topic, go to the [U.S. Environmental Protection Agency \(EPA\) website on the Coastal Zone Management Act \(CZMA\)](#).

You can also view all CZMAs on the National Ocean and Atmosphere Administration's (NOAA) website showing [States and Territories Working on Ocean and Coastal Management](#).

The screenshot shows the NOAA website interface. At the top, there is a header for the U.S. Department of Commerce National Oceanic and Atmospheric Administration. Below this is a banner for 'OCEAN & COASTAL RESOURCE MANAGEMENT' with sub-links for 'site map', 'contacts', and 'my state'. A left-hand navigation menu includes links for Home, About Us, Our Programs, Federal Consistency, Coastal Issues, Initiatives, Measuring Success, Funding, Resources (highlighted with a dotted box), and Education and Outreach. The main content area is titled 'States and Territories Working on Ocean and Coastal Management' and includes the text: 'Click on a state or territory below to see what we're doing to manage your state's oceans and coasts.' Below this text is an interactive map titled 'OCRM IN YOUR STATE' showing the United States with colored markers indicating coastal resource management activities. A legend on the right side of the map lists various programs: STATE, CZMP, NERR, CELCP, MPA, and CRCP. At the bottom of the page, there is a grid of 24 links, one for each state and territory, including Alabama, Alaska, American Samoa, California, Connecticut, Delaware, Florida, Georgia, Guam, Hawaii, Illinois, Indiana, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Northern Mariana Islands, Ohio, Oregon, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Texas, Virgin Islands, and Wisconsin.
