

STATEMENT OF WORK
Stripcropping (585)
Iowa

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN**Deliverables:**

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices
 - a. Practice purpose(s) as identified in the conservation plan.
 - b. List of required permits to be obtained by the client
 - c. Aerial photo or plan map with location of practice identified
 - d. List of facilitating practice(s)
 - e. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to:
 - i. Number of strips
 - ii. Minimum and maximum row grade for tilled strips (for sheet and rill erosion)
 - iii. Alignment, orientation and width of strips (for wind erosion)
 - iv. Vegetative cover
 - v. Width of strips
 - vi. Results of NRCS-approved erosion prediction tools (RUSLE2 and WEPS)
 - vii. Stable outlets
 - viii. Planned rotation and residue levels for tilled strips
2. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to apply the practice and obtain necessary permits. Plans and specifications shall be developed in accordance with the requirements of conservation practice standard Stripcropping (Code 585) and Agronomy Technical Note 16
3. Operation and maintenance plan
4. Certification that the design meets NRCS practice standard criteria and comply with applicable laws and regulations
5. Design modifications during installation as required

INSTALLATION**Deliverables**

1. Pre-application conference with client
2. Verification that client has obtained required permits
3. Staking and layout according to plans as requested by producer
4. Plans and specifications including applicable layout notes needed for producer to be able to install this practice
5. Copy of the results from NRCS Erosion Prediction tools (RUSLE2 and/or WEPS)
6. Application guidance as needed
7. Facilitate and implement required design modifications with client and original designer
8. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation
9. Certification that the application process and materials meets design and permit requirements

CHECK OUT**Deliverables**

1. Records of application
 - a. Number and width of strips
 - b. Actual row grade applied (for sheet and rill erosion) or strip orientation (for wind erosion)
 - c. Extent of practice units applied (in acres)
 - d. Aerial photo or plan map showing the location of field(s) and/or area within the field where this practice has been applied
2. Certification that the application meets NRCS standards and specifications and is in compliance with permits
3. Provide progress reporting information to NRCS
