TECHNICAL GUIDE NOTICE IL - 240

Purpose: To distribute a RUSLE 2 database update file and instructions.

Background: Periodically, RUSLE 2 databases need to be updated with new vegetation, operation, and other records. RUSLE 2 update files are prepared nationally and released to RUSLE 2 users in order to update their RUSLE 2 databases with the latest data. Technical Guide Notice 240 distributes the latest RUSLE 2 database file and instructions for importing into the county specific RUSLE 2 databases.

Action: Save the "NRCS_Moses_updates_beginning 81600 to 110210.gdb" into the "C:\Program Files\USDA\Rusle2\Import" folder on any office computer that has RUSLE 2. Launch RUSLE 2. At the top of the menu bar left click on "database". A pull down menu will appear and select "Import RUSLE 2 database..." The files in the "Import" folder will be displayed. Select the "NRCS_Moses_updates_beginning 81600 to 010210.gdb" file. Then press "Open". A new window will pop up. Place the cursor in the upper most box at the left and single left click. Then press "Import". Close RUSLE 2 when the import is completed. The process only needs to be performed once because the RUSLE 2 database resides on the Service Center shared drive.

The FOTG can be accessed through the Illinois home page by clicking on "FOTG" or at <http://www.nrcs.usda.gov/technical/efotg/>.

Technical Guide Notice 240 is filed under Section I, "FOTG transmittals" at the FOTG site.

A handwritten signature in black ink that reads "William J. Gradle".

WILLIAM J. GRADLE
State Conservationist
