TECHNICAL GUIDE NOTICE IL-28

It has been brought to our attention that in some cases the reverse side of page 4 of the Brush Management standard and specification was not printed as we had intended.

In view of recent precautions issued by our Washington Office in regard to recommendations of agricultural chemicals, it is felt we need to make doubly sure that our standard on Brush Management carries the proper restrictions in a manner that prevents the restrictive information from becoming detached from the table of herbicides.

Therefore, we are asking you to replace pages 4 & 5 (2 sheets) Brush Management, Section IV with the enclosed pages 4 & 5 (single sheet). If pages 4 & 5 are presently on a single sheet for this standard, then no change is required.

Also please correct by pen and ink the standard for Recreation Area Improvement, Table I, second mixture under Moderate Use Areas to read:

10-50	-	Kentucky bluegrass	50
		Red fescue	10
