U.S. DEPARTMENT OF AGRICULTURE

SOIL CONSERVATION SERVICE

CHAMPAIGN, ILLINOIS

June 1983

TECHNICAL GUIDE NOTICE IL - 62

This notice transmits revisions to be made in the WINDBREAK (PLANTING) groups in Section II - N (Windbreak interpretations) of the Technical Guide.

## ACTION REQUIRED

Delete both Tatarian and Whitebelle honeysuckle from all planting groups by drawing a line through the common name, the scientific name and the 20 year heights for both of the above plants. One or both of the plants are listed on pages 2,3,4,5,6,8,9,10,11,12,13,14,15 and 16 of the Windbreak Planting Groups. Also delete the 10-foot height indicated for Autumn-olive in Plant Suitability Zone II on page 10 of the Planting Groups, by drawing a line through the 10. Add NS adjacent to the lined out 10 to indicate autumn-olive is not suitable in zone II.

A handwritten signature in black ink, appearing to read "S. A. Probst".

STEVEN A. PROBST  
State Resource Conservationist
