TECHNICAL GUIDE NOTICE-IL-9

Attached are revisions for the Technical Guide, Section IV, "Standards and Specifications".

Destroy entire standard and specification, "Disposal Lagoon", IL-E-8-71, and replace with revised copy, "Disposal Lagoon", (359).

Destroy standard and specification, "Animal Waste Control Facilities", IL-E-9-71 and "Animal Waste Holding Tanks", IL-E-10-71. Replace with new standards "Holding Tanks" and "Holding Pond" (425).

These newly revised standards have already been added to the Table of Contents. Note that "Holding Tanks" and "Holding Pond" are listed as one standard, and may be considered as such.

Since these standards have been completely revised, it is essential for everyone providing assistance on these practices to become familiar with the information and requirements provided in these standards,

The standard for "Holding Tanks" contains Structural Design Criteria for Liquid Manure Holding Tanks. Plans for tanks, provided by builders or suppliers on jobs where we have technical responsibility, must meet these requirements. To provide uniformity and prevent duplication, we will send these requirements to builders and suppliers and work with them as needed. Please send me the names of any firm which you feel will be interested in providing this material to qualify their product for use. You should do this as soon as possible if they plan to have any constructed this season.
