

Resource Category – Degraded Plant Condition
Resource Concern – Excessive Plant Pest Pressure
Land Use - Crop
Priority Rank by Land Use - Priority #11 of 11 for Crop

At Risk Acres

Crop acres within a 1 mile buffer of Kudzu points from IDNR Forest Assessment, 2010.

Acres Needing Treatment

It was assumed that no practices are in place to treat this resource concern yet.

Priority Areas

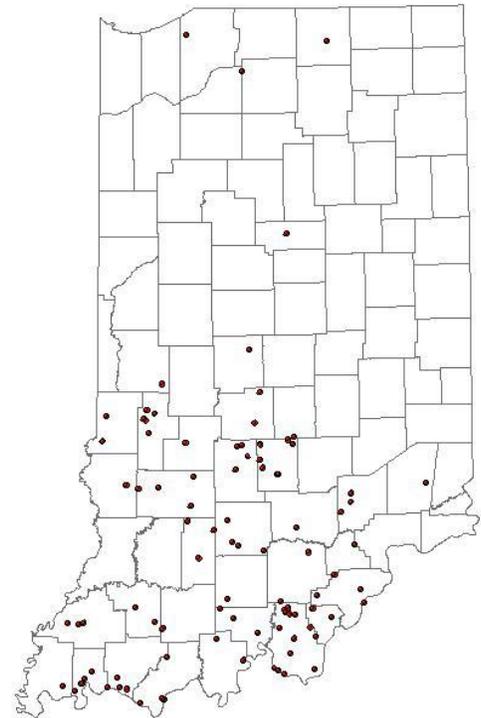

The same as the At Risk Acres in this scenario².

Results

	Statewide Acres	Priority Zone Acres
At Risk:	32,372	32,372
Needing Treatment:	32,372	32,372
To Treat 2012-2014:	2,800	2,800

Input Data Sets

- USGS NLCD 2006 (modified)
- NRCS Planned Land Units (with the above practices)
- IDNR DOF 2010 Assessment - Emerald Ash Borer, Gypsy Moth, and Kudzu Locations, p. 33 (used for Kudzu)

SRA Indiana NRCS Cropland Priority Areas for Degraded Plant Condition – Excessive Plant Pest Pressure

² No detailed map or table was generated for this report for this concern because site specific display is not significantly improved with a full page map and the priority areas match the at risk areas.
