

## Vegetated Splash Pad on Channel Bank

**Notes:**

1. Plant vegetation prior to placing 8-inch riprap or TRM, if used.
2. The 8-inch geocell will be filled with 2" of soil material at the bottom and then filled to the top of the geocell with 3-inch gravel material.
3. Plant vegetation in soil material prior to placement of gravel material.
4. Minimum width of slope protection will be 8 feet.
5. Minimum length of slope protection will be 10 feet.
