

Kansas EQIP Practice Payment Schedule
Fiscal Year 2009
Supplement No. 2 - 5/8/2009

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	Ranking Categories									
					CLH	FLH	GLH	SFR	WQI/ LSW	WQn/ QRA	Organic	Tribal	BF/ LRF/ SDF	
100 Comprehensive Nutrient Management Plan														
Supp. #1-3/9/09	One time payment to encourage the participant to hire a technical service provider for completion of the Comprehensive Nutrient Management Plan (CNMP). Not eligible for payment if the Natural Resources Conservation Service completes the CNMP.	Each	\$1,200.00	\$1,440.00						X ¹²		X ¹²		X ¹²
313 Waste Storage Facility														
	A Liquid Storage facility consisting of a cast-in-place concrete tank below ground. The unit cost for this facility is based on the cubic feet (CuFt) of total storage in the structure.	CuFt	\$1.88	\$2.26						X		X		X
	A Liquid Storage facility consisting of a prefabricated glass-fused metal or similar storage tank. The unit cost for this facility is based on the cubic feet of total storage in the structure.	CuFt	\$2.33	\$2.79						X		X		X
	A Solid Storage facility to store manure and bedding. The unit cost for this activity will be the animal units (AU) used for design.	AU	\$331.06	\$397.27						X		X		X
	Embankment - A waste storage pond constructed by a combination of excavation and earthfill; more than three feet of fill. The unit cost of this structure is based on the cubic yards (CuYd) of storage at the design storage level without freeboard.	CuYd	\$0.89	\$1.07						X		X		X
	Excavated - A waste storage pond constructed by excavating a pit with a small berm around the pond, normally less than three feet high. The unit cost will be based on the cubic yards of storage at the design storage level without freeboard.	CuYd	\$1.65	\$1.99						X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - A Liquid Storage facility consisting of a cast-in-place concrete tank below ground. The unit cost for this facility is based on the cubic feet of total storage in the structure.	CuFt	\$1.26	\$1.88						X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - A Liquid Storage facility consisting of a prefabricated glass-fused metal or similar storage tank. The unit cost for this facility is based on the cubic feet of total storage in the structure.	CuFt	\$1.55	\$2.33						X		X		X

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
313 Waste Storage Facility (continued)													
Supp. #1-3/9/09	Livestock Waste (New Facility) - A Solid Storage facility to store manure and bedding. The unit cost for this activity will be the animal units used for design.	AU	\$220.70	\$331.06					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Embankment - Waste storage pond constructed by combination of excavation and earthfill; more than three feet of fill. The unit cost of this structure is based on cubic yards of storage at the design storage level without freeboard.	CuYd	\$0.59	\$0.89					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Excavated - Waste storage pond constructed by excavating a pit with small berm around the pond, normally less than three feet high. The unit cost will be based on cubic yards of storage at the design storage level without freeboard.	CuYd	\$1.10	\$1.65					X		X		X
314 Brush Management													
	Chemical Aerial Broadcast Treatment	Acre	\$24.49	\$29.39			X ¹⁰					X ¹⁰	X ¹⁰
	Chemical Ground Broadcast / Spot	Acre	\$24.02	\$28.82			X ¹⁰					X ¹⁰	X ¹⁰
	Mechanical Treatment High Infestation Level	Acre	\$236.25	\$283.50			X				X	X	X
	Mechanical Treatment Medium Infestation Level	Acre	\$118.13	\$141.75			X				X	X	X
	Mechanical Treatment Low Infestation Level - Eligible only when total canopy cover of all woody species to be treated meets or exceeds medium infestation level as found in Table I of the Brush Management specification.	Acre	\$55.13	\$66.15							X	X	X
316 Animal Mortality Facility													
	A chest type freezer with removable trays for dead animals set on a concrete slab. The unit cost is for each freezer unit installed.	Each	\$12,876.68	\$15,452.01					X		X		X
	A concrete block lined disposal pit with a concrete slab cover and two chute openings. The unit cost is based on the square feet (SqFt) of pit area.	SqFt	\$28.40	\$34.08					X		X		X
	A dual burning incinerator approved for dead animals set on a concrete slab. The unit cost is for each incinerator installed.	Each	\$15,560.48	\$18,672.57					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - A chest type freezer with removable trays for dead animals set on a concrete slab. The unit cost is for each freezer unit installed.	Each	\$8,584.45	\$12,876.68					X		X		X

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
316	Animal Mortality Facility (continued)												
Supp. #1-3/9/09	Livestock Waste (New Facility) - A concrete block lined disposal pit with a concrete slab cover and two chute openings. The unit cost is based on the square feet of pit area.	SqFt	\$18.93	\$28.40					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - A dual burning incinerator approved for dead animals set on a concrete slab. The unit cost is for each incinerator installed.	Each	\$10,373.65	\$15,560.48					X		X		X
317	Composting Facility												
	A mechanical composter for dead animals and bedding set on a concrete slab. The unit cost is for each composter installed.	Each	\$27,341.48	\$32,809.77					X ⁵		X ⁵		X ⁵
	Open lot Facility - A composting facility consisting of a compacted and leveled area for composting manure and bedding. The unit cost for this activity is the acres of area utilized as a compost facility.	Acre	\$1,555.17	\$1,866.21					X ⁵		X ⁵		X ⁵
	Structure Facility - A composting facility consisting of concrete slab and walls, but not including the roof structure, for composting dead animals and manure or bedding. The unit cost for this activity is the square feet of area of compost facility constructed.	SqFt	\$5.56	\$6.67					X ⁵		X ⁵		X ⁵
Supp. #1-3/9/09	Livestock Waste (New Facility) - A mechanical composter for dead animals and bedding set on a concrete slab. The unit cost is for each composter installed.	Each	\$18,227.65	\$27,341.48					X ⁵		X ⁵		X ⁵
Supp. #1-3/9/09	Livestock Waste (New Facility) - Open lot Facility - A composting facility consisting of a compacted and leveled area for composting manure and bedding. The unit cost for this activity is the acres of area utilized as a compost facility.	Acre	\$1,036.78	\$1,555.17					X ⁵		X ⁵		X ⁵
Supp. #1-3/9/09	Livestock Waste (New Facility) - Structure Facility - Composting facility consisting of concrete slab and walls, but not including roof structure, for composting dead animals and manure or bedding. Unit cost is square feet of area of compost facility constructed.	SqFt	\$3.71	\$5.56					X ⁵		X ⁵		X ⁵
322	Channel Bank Vegetation												
	Bareroot Seedling Planting	Each	\$1.04	\$1.25		X		X	X		X	X	X
	Live Willow Cuttings Planting	Each	\$1.32	\$1.59		X		X	X		X	X	X
	Native Grass Seeding	Acre	\$112.35	\$134.82		X		X	X		X	X	X
	Rhizome Planting	Each	\$0.58	\$0.70		X		X	X		X	X	X

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
328 Conservation Crop Rotation													
Supp. #1-3/9/09	Implementation of a three crop type rotation. Practice will be implemented a minimum of three years. Payment will be made upon annual implementation of the practice.	Acre	\$7.00	\$8.00	X ⁹			X ⁹	X ^{4,9}	X		X ⁹	X ⁹
Supp. #2-5/8/09	Organic - Implementation of a three crop type rotation. Practice will be implemented a minimum of three years. Payment will be made upon annual implementation of the practice.	Acre	\$9.00	\$11.00							X ⁹		
Supp. #1-3/9/09	Implementation of a conservation crop rotation system where 100% of water right is converted to non-irrigated cropland. Only irrigated acres are eligible for payment. Practice will be implemented minimum of three years. Payment will be made upon annual implementation of the practice.	Acre	\$90.00	\$93.00						X			
Supp. #1-3/9/09	Implementation of a conservation crop rotation system where 100% of water right is converted to non-irrigated cropland. Only irrigated acres are eligible for payment. Practice will be implemented a minimum of three years. Payment will be made upon annual implementation of the practice. Eligible only in Kansas Water Office, Groundwater Management District, and Kansas Department of Agriculture Division of Water Resources (KDA/DWR) designated Quick Response Areas.	Acre	\$150.00	\$152.00						X			
329 Residue and Tillage Management, No-Till/Strip Till/Direct Seed													
Supp. #1-3/9/09	No Till/Strip Till. Minimum three crop type rotation will be installed. Practice will be implemented a minimum of three years. Payment will be made upon annual implementation of the practice.	Acre	\$13.00	\$16.00	X ⁴			X ⁴	X ⁴	X ¹⁵	X ⁴	X ⁴	X ⁴
332 Contour Buffer Strips													
	Introduced Grass Seeding	Acre	\$59.85	\$71.82				X	X	X	X	X	X
	Introduced Grass Seeding With Fertilizer Application	Acre	\$75.98	\$91.17				X	X	X	X	X	X
	Native Grass and Forb Seeding	Acre	\$123.98	\$148.77				X	X	X	X	X	X
	Native Grass Seeding	Acre	\$112.35	\$134.82				X	X	X	X	X	X
338 Prescribed Burning													
	Prescribed Burning	Acre	\$5.25	\$6.30			X				X	X	X

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
340	Cover Crop												
	Cover Crop	Acre	\$28.80	\$34.56	X		X	X	X	X ¹⁴		X	X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Cover Crop	Acre	\$19.20	\$28.80					X				X
Supp. #2-5/8/09	Organic - Cover Crop	Acre	\$42.05	\$50.46							X		
Supp. #2-5/8/09	Organic - Livestock Waste (New Facility) - Cover Crop	Acre	\$28.03	\$42.05							X		
342	Critical Area Planting												
	Bermuda Grass Sprigging	Acre	\$139.94	\$167.92	X		X	X	X	X ¹⁴	X	X	X
	Bermuda Grass Sprigging With Fertilizer Application	Acre	\$156.06	\$187.27	X		X	X	X	X ¹⁴	X	X	X
	Introduced Grass Seeding	Acre	\$59.85	\$71.82	X		X	X	X	X ¹⁴	X	X	X
	Introduced Grass Seeding With Fertilizer Application	Acre	\$75.98	\$91.17	X		X	X	X	X ¹⁴	X	X	X
	Native Grass Seeding	Acre	\$112.35	\$134.82	X		X	X	X	X ¹⁴	X	X	X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Bermuda Grass Sprigging	Acre	\$93.29	\$139.94					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Bermuda Grass Sprigging With Fertilizer Application	Acre	\$104.04	\$156.06					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Introduced Grass Seeding	Acre	\$39.90	\$59.85					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Introduced Grass Seeding With Fertilizer Application	Acre	\$50.65	\$75.98					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Native Grass Seeding	Acre	\$74.90	\$112.35					X		X		X
345	Residue and Tillage Management, Mulch Till												
Supp. #1-3/9/09	Mulch Till. Minimum three crop type rotation will be installed. Practice will be implemented a minimum of three years. Payment will be made upon annual implementation of the practice.	Acre	\$10.00	\$12.00									
					X ⁴			X ⁴	X ⁴	X ¹⁵	X ⁴	X ⁴	X ⁴
346	Residue and Tillage Management, Ridge Till												
Supp. #1-3/9/09	Ridge Till. Minimum three crop type rotation will be installed. Practice will be implemented a minimum of three years. Payment will be made upon annual implementation of the practice.	Acre	\$13.00	\$16.00									
					X ⁴			X ⁴	X ⁴	X ¹⁵	X ⁴	X ⁴	X ⁴
350	Sediment Basin												
	Sediment basin constructed to capture sediment and slowly release water. Unit cost for this practice is cubic yards of earthfill in the basin.	CuYd	\$1.97	\$2.36					X	X		X	X

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
351 Well Decommissioning													
Supp. #1-3/9/09	Decommissioning or plugging a drilled well with a 15-inch or smaller diameter casing. The unit cost is based on the well depth in feet (Ft).	Ft	\$3.73	\$4.48				X	X	X	X	X	X
Supp. #1-3/9/09	Decommissioning or plugging a dug well greater than 15 inches in diameter. The unit cost is based on the well depth in feet.	Ft	\$25.66	\$30.79				X	X	X	X	X	X
353 Monitoring Well													
Supp. #1-3/9/09	A monitoring well and well head protection installed as part of an animal waste system to monitor ground water quality. The unit cost is based on the well depth in feet.	Ft	\$13.86	\$16.63					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - A monitoring well and well head protection installed as part of an animal waste system to monitor groundwater quality. The unit cost is based on the well depth in feet.	Ft	\$9.24	\$13.86					X		X		X
356 Dike													
	Any type of dike installation. The unit cost is the linear feet (LnFt) of dike installed.	LnFt	\$4.56	\$5.47				X	X		X	X	X
359 Waste Treatment Lagoon													
Supp. #1-3/9/09	Embankment - A waste lagoon constructed by a combination of excavation and earthfill; more than three feet of fill. The unit cost of this structure is based on the cubic yards of storage at the design storage level without freeboard.	CuYd	\$1.02	\$1.22					X		X		X
Supp. #1-3/9/09	Excavated - A waste lagoon constructed by excavating a pit with a small berm around the lagoon, normally less than three feet high. The unit cost will be based on the cubic yards of storage at the design storage level without freeboard.	CuYd	\$2.01	\$2.41					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Embankment - Waste lagoon constructed by a combination of excavation and earthfill; more than three feet of fill. The unit cost of this structure is based on the cubic yards of storage at the design storage level without freeboard.	CuYd	\$0.68	\$1.02					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Excavated - Waste lagoon constructed by excavating a pit with small berm around the lagoon, normally less than three feet high. Unit cost will be based on the cubic yards of storage at the design storage level without freeboard.	CuYd	\$1.34	\$2.01					X		X		X

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
360	Closure of Waste Impoundment												
	Close an embankment type waste storage pond by removing accumulated sludge and the embankment to surrounding ground levels. The unit cost of this activity is based on the cubic yards of total storage in the structure after the sludge is removed.	CuYd	\$0.97	\$1.17					X		X		X
	Close an excavated waste storage pond by removing accumulated sludge and filling the excavated pond to surrounding ground levels. The unit cost of this activity is based on the cubic yards of total storage in the structure after the sludge is removed.	CuYd	\$2.37	\$2.85					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Close an embankment type waste storage pond by removing accumulated sludge and the embankment to surrounding ground levels. Unit cost is based on cubic yards of total storage in the structure after sludge is removed.	CuYd	\$0.65	\$0.97					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Close an excavated waste storage pond by removing accumulated sludge and filling excavated pond to surrounding ground levels. Unit cost is based on cubic yards of total storage in the structure after sludge is removed.	CuYd	\$1.58	\$2.37					X		X		X
362	Diversion												
Supp. #1-3/9/09	A diversion installed to divert a stream around an existing animal feeding operation. The unit cost is the cubic yards of excavation in the installed diversion.	CuYd	\$1.64	\$1.97				X	X	X ¹⁴	X	X	X
Supp. #1-3/9/09	A diversion installed with a ridge and channel. The unit cost is the cubic yards of earthfill in the installed diversion.	CuYd	\$1.66	\$1.99				X	X	X ¹⁴	X	X	X
Supp. #1-3/9/09	Livestock Waste (New Facility) - A diversion installed with a ridge and channel. The unit cost is the cubic yards of earthfill in the installed diversion.	CuYd	\$1.11	\$1.66					X		X		X

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
365	Anaerobic Digester, Ambient Temperature												
	A earthen pond anaerobic digester constructed by excavating a pit with a small berm around the pond, normally less than three feet high. The unit cost will be based on the cubic yards of storage at the design storage level without freeboard.	CuYd	\$1.87	\$2.24					X		X		X
	An above-ground prefabricated glass-fused metal or similar storage tank with mixing devices set on a concrete base to be used as a digester. The unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$2.73	\$3.28					X		X		X
	An in-ground concrete or similar storage tank with mixing devices to be used as a digester. The unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$1.05	\$1.26					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - An in-ground concrete or similar storage tank with mixing devices to be used as a digester. The unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$0.70	\$1.05					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - An above-ground prefabricated glass-fused metal or similar storage tank with mixing devices set on a concrete base to be used as a digester. Unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$1.82	\$2.73					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Earthen pond anaerobic digester constructed by excavating a pit with small berm around the pond, normally less than three feet high. Unit cost will be based on cubic yards of storage at the design storage level without freeboard.	CuYd	\$1.25	\$1.87					X		X		X
366	Anaerobic Digester, Controlled Temperature												
	Above Ground Facility - A prefabricated glass-fused metal or similar storage tank to be used as a plug flow or complete mix digester. The unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$2.93	\$3.51					X		X		X
	Fixed Film Facility - A prefabricated glass-fused metal or similar storage tank with a film membrane to be used as a fixed film digester. The unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$2.78	\$3.34					X		X		X
	In Ground Facility - An in-ground concrete or similar storage tank to be used as a plug flow digester. The unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$1.04	\$1.25					X		X		X

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
366 Anaerobic Digester, Controlled Temperature (continued)													
Supp. #1-3/9/09	Livestock Waste (New Facility) - In Ground Facility - An in-ground concrete or similar storage tank to be used as a plug flow digester. The unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$0.69	\$1.04					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Above Ground Facility - A prefabricated glass-fused metal or similar storage tank to be used as a plug flow or complete mix digester. The unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$1.95	\$2.93					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Fixed Film Facility - A prefabricated glass-fused metal or similar storage tank with a film membrane to be used as a fixed film digester. The unit cost is based on the cubic feet of storage at the design level without freeboard.	CuFt	\$1.86	\$2.78					X		X		X
367 Waste Facility Cover													
	A fabricated rigid cover (roof) for a waste storage facility to reduce the volume of waste runoff. The unit cost is based on the square feet of cover (roof) installed.	SqFt	\$6.75	\$8.10					X		X		X
	A flexible membrane installed over a waste storage lagoon or pond to improve air quality. The unit cost is based on the square feet of cover installed.	SqFt	\$0.93	\$1.12					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - A fabricated rigid cover (roof) for a waste storage facility to reduce the volume of waste runoff. The unit cost is based on the square feet of cover (roof) installed.	SqFt	\$4.50	\$6.75					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - A flexible membrane installed over a waste storage lagoon or pond to improve air quality. The unit cost is based on the square feet of cover installed.	SqFt	\$0.62	\$0.93					X		X		X

410	Grade Stabilization Structure												
	A grade stabilization structure consisting of an embankment, large diameter principal spillway and drop inlet, and other appurtenances. The unit cost is based on the cubic yards of embankment, which includes the earthfill in the cutoff trench.	CuYd	\$4.48	\$5.38			X	X	X	X ¹⁴	X	X	X
	Installation of a concrete drop box spillway structure including all associated items using standard approved designs. The unit cost is based on the cubic yards of concrete installed.	CuYd	\$402.34	\$482.80			X	X	X	X ¹⁴	X	X	X
	Installation of a rock chute or a drop structure using gabion baskets or mattresses. The unit cost of these structures is based on the tons of rock installed and includes all bedding and other materials.	Ton	\$36.20	\$43.44			X	X	X	X ¹⁴	X	X	X
	Installation of a terrace outlet or other concrete structure using standard designs and including all associated items. The unit cost is based on the cubic yards of concrete installed.	CuYd	\$269.19	\$323.03			X	X	X	X ¹⁴	X	X	X
	Installation using large concrete blocks or small concrete masonry units laid on a slope. The unit cost is based on a Structure Factor (SF), which is the drop height (ft) x the design width (ft), and includes earthwork, geotextile, and bedding.	SF	\$63.45	\$76.14			X	X	X	X ¹⁴	X	X	X
412	Grassed Waterway												
	Placing topsoil from a stockpile in the bottom of a grassed waterway as required by the design due to special conditions. The unit cost is based on the acres of waterway shaped.	Acre	\$842.54	\$1,011.05				X	X	X ¹⁴	X	X	X
	Shaping and/or grading of a grassed waterway to the design dimensions. The unit cost is based on the acres of waterway shaped.	Acre	\$1,429.31	\$1,715.18				X	X	X ¹⁴	X	X	X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Placing topsoil from a stockpile in the bottom of a grassed waterway as required by the design due to special conditions. The unit cost is based on the acres of waterway shaped.	Acre	\$561.69	\$842.54					X		X		X
Supp. #1-3/9/09	Livestock Waste (New Facility) - Shaping and/or grading of a grassed waterway to the design dimensions. The unit cost is based on the acres of waterway shaped.	Acre	\$952.88	\$1,429.31					X		X		X
428A	Irrigation Water Conveyance, Ditch and Canal Lining, Nonreinforced Concrete												
	Installation of a concrete slip-formed liner in a new or existing field ditch or canal. The unit cost is based on linear feet of ditch liner installed.	LnFt	\$2.42	\$2.91						X			

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
430DD Irrigation Water Conveyance, Pipeline, High-Pressure, Underground, Plastic													
	Installation of a two-inch or smaller plastic pipe as the supply line for micro-irrigation of trees or shrubs. The unit cost is based on the linear feet of pipe installed and includes all valves, connections, and other appurtenances.	LnFt	\$1.35	\$1.63						X			
	Installation of a high pressure PVC pipeline, six to eight-inch diameter, for irrigation water supply. The unit cost is based on linear feet of pipeline installed and includes all valves, connections, and other appurtenances.	LnFt	\$4.11	\$4.93						X			
	Installation of a high pressure PVC pipeline, 10-inch diameter, for irrigation water supply. The unit cost is based on linear feet of pipeline installed and includes all valves, connections, and other appurtenances.	LnFt	\$5.84	\$7.01						X			
	Installation of a high pressure PVC pipeline, 12-inch diameter or larger, for irrigation water supply. The unit cost is based on linear feet of pipeline installed and includes all valves, connections, and other appurtenances.	LnFt	\$7.98	\$9.57						X			
430EE Irrigation Water Conveyance, Pipeline, Low-Pressure, Underground, Plastic													
	Installation of a low pressure PVC pipeline, six- to eight-inch diameter, for irrigation water supply. The unit cost is based on linear feet of pipeline installed and includes all valves, connections, and other appurtenances.	LnFt	\$3.46	\$4.16						X			
	Installation of a low pressure PVC pipeline, 10-inch diameter, for irrigation water supply. The unit cost is based on linear feet of pipeline installed and includes all valves, connections, and other appurtenances.	LnFt	\$4.77	\$5.72						X			
	Installation of a low pressure PVC pipeline, 12-inch or larger diameter, for irrigation water supply. The unit cost is based on linear feet of pipeline installed and includes all valves, connections, and other appurtenances.	LnFt	\$6.49	\$7.79						X			
441 Irrigation System, Microirrigation													
	Conversion from surface or sprinkler irrigation to a subsurface drip irrigation (SDI) system. The unit cost is based on the acres of cropland irrigated by the SDI system and includes the subsurface tape or tubing, filters, regulators, valves, etc. (Limited to \$800/acre payment cap)	Acre	\$1,116.49	\$1,339.79						X			
	Installation of a drip or trickle microirrigation system for establishment of trees or shrubs. The unit cost is based on the number of trees and/or shrubs watered and includes all pipe, valves, filters, etc.	Each	\$2.45	\$2.94		X ²		X ²	X ²		X ²	X ²	X ²

Practice Code and Name	Activity Type	Unit	Payment Rate	Payment Rate - HU ¹	CLH	FLH	GLH	SFR	WQI/LSW	WQn/QRA	Organic	Tribal	BF/LRF/SDF
442	Irrigation System, Sprinkler												
	Convert from surface irrigation or a water drive system to a low pressure pivot or linear move system on less than 240 acres. The unit cost for this activity is acres watered by the irrigation system installed.	Acre	\$393.75	\$472.50						X			
	Convert from surface irrigation or a water drive system to a low pressure pivot or linear move system on more than 240 acres. The unit cost for this activity is acres watered by the irrigation system installed.	Acre	\$242.97	\$291.56						X			
449	Irrigation Water Management												
	Irrigation Water Management. Financial assistance is authorized when current water use is reduced a minimum of 35 percent. Practice must be installed and payment taken for three years.	Acre	\$50.00	\$50.00						X			
462	Precision Land Forming												
	Installation of graded basins as part of a water spreading system. The unit cost is based on the acres in the entire field where precision land forming is installed.	Acre	\$497.66	\$597.19				X	X		X		X
466	Land Smoothing												
	Removal of surface irregularities such as old terraces to permit the installation of a conservation practice. The unit cost is based on the acres in the entire field where land smoothing is required.	Acre	\$21.66	\$25.99			X	X	X		X	X	X
468	Lined Waterway or Outlet												
	Installation of a concrete lining in the flow portion of a waterway. The unit cost is based on the cubic yards of concrete installed in the lining and includes the excavation required to shape the waterway.	CuYd	\$118.33	\$142.00				X	X		X		X
	Installation of a permanent Turf Reinforcement mat (TRM) in the flow area of a waterway. The unit cost is based on the square yards (SqYd) of TRM installed and includes the excavation required to shape the waterway.	SqYd	\$6.93	\$8.32				X	X		X		X
	Installation of a well graded rock riprap lining in the flow area of a waterway. The unit cost is based on the tons of rock installed, including the bedding material, and also includes the excavation required to shape the waterway.	Ton	\$36.55	\$43.86				X	X		X		X

Ranking Categories: CLH-Cropland Health; FLH-Forestland Health; GLH-Grazing Lands Health; SFR-Sedimentation of Federal Reservoirs; WQI/LSW-Water Quality/Livestock Waste; WQn/QRA-Water Quantity/Quick Response Area; BF/LRF/SDF-Beginning Farmer/Limited Resource Farmer/Socially Disadvantaged Farmer

¹ A higher payment rate has been set for any participant that qualifies as Historically Underserved (HU): Limited Resource Farmer or Rancher (LRF), Beginning Farmer or Rancher (BF), or Socially Disadvantaged Farmer or Rancher (SDF). LRF, BF, or SDF may apply under their ranking category or the category specific to their resource concern. (Note: Tribal and BF/LRF/SDF are already set at the HU Payment Rate).

² Practice eligible for use with tree and shrub plantings associated with practice codes 380, 391, 612, and 650.

³ Practices are eligible on cropland planted to permanent vegetation meeting NRCS electronic Field Office Technical Guide (eFOTG) standards and specifications of practice codes 512, 550, or 645.

⁴ This practice will be installed for the entire crop rotation or contract length, whichever is longer; a minimum three crop type rotation will be installed.

- ⁵ Practice must be part of a Nutrient Management Plan that is developed prior to payment for this practice. For imported waste, the payment is limited to the storage needed for the contracted waste.
- ⁶ The payment is eligible from a north south line from Washington County to Cowley County and all counties east thereof. Burning shall not occur between May 1 and July 31.
- ⁷ Management payment to leave brood strips in wheat stubble. Strips must be a minimum of one acre and must not exceed ten percent of an individual field. Pivot corners and fields \leq one acre are eligible in their entirety. No stubble manipulation (tillage, mowing, spraying, grazing, etc.) allowed following crop harvest until after March 31 of the following year.
- ⁸ Management payment to leave unharvested strips in hayland fields of warm-season grasses or alfalfa. Harvest must start in the middle of the field and proceed outward or begin on one side and move across the field.
- ⁹ Payment for 328 is not eligible on the same acres where payment is being received for practice codes 329, 345, or 346.
- ¹⁰ Broadcast and aerial treatment will be eligible only where mechanical or spot treatment are not practical. If broadcast or aerial treatment is needed, justification will be documented in the producer's case file.
- ¹¹ Where cropland is converted to grazing land, cropland acres will not consist of more than 20 percent of the application acres.
- ¹² This is a one-time payment to encourage the participant to hire a technical service provider for completion of the Comprehensive Nutrient Management Plan (CNMP). This practice is not eligible for payment if the NRCS completes the CNMP.
- ¹³ Practice is eligible for management payment only where livestock are excluded for 12 consecutive months and followed by two years of prescribed grazing. Practice codes 472 and 528 will not be applied for payment on the same acres in the same year.
- ¹⁴ Practices are eligible on irrigated acres that are converting to non-irrigated.
- ¹⁵ Eligible only if the producer is reducing current water use by a minimum 35 percent.
- ¹⁶ Financial assistance is authorized when the practice is installed for conversion from irrigated cropland to non-irrigated grassland on all acres under the water right. (Planting will meet NRCS practice code 512 standards and specifications). Payment is only authorized on the converted acres and must be taken for three years.
