

Forage and Biomass Planting

Overseeding existing pasture(s) with legumes
Job Sheet (Operation and Maintenance-512)

Natural Resources Conservation Service (NRCS)

February 2015

Participant Name _____

Contract # _____

**INFORMATION ON THIS JOB SHEET IS
CONSIDERED TO BE PART OF THE
CONTRACT AND/OR CONSERVATION
PLAN.**

Purpose

This job sheet will be used in establishing a stand of legumes in an existing pasture or hayland field.

Conditions Where Practice Applies

On any existing pasture or hayland field that is in poor condition or that needs nitrogen fertilization.

Establishment Specifications

1. Plant species and seeding rates will be consistent with Table 6 of the University of Kentucky's "Renovating Hay and Pasture Fields" AGR-26 publication.

2. Species and seeding rates for each field are summarized in Table 1.
3. Follow the six (6) steps of pasture renovation in the *How to Renovate* section of the University of Kentucky's "Renovating Hay and Pasture Fields" AGR-26 publication.

Operation and Maintenance

Manage the renovated field according to the *Managing Renovated Fields* section of the University of Kentucky's "Renovating Hay and Pasture Fields" AGR-26 publication.
