**TECHNICAL GUIDE NOTICE NO. 372**

This notice transmits the updated NRCS Practices Effects on Threatened and Endangered Species for use by Kentucky NRCS conservation planners.

The document has been updated to reflect Kentucky's current list of active practices and any beneficial or adverse effects on T&E species identified in KY counties. The document was authored by Casey Shrader, KY NRCS State Biologist, and reviewed and approved by US Fish and Wildlife representatives.

The document, titled "Practices Effects Document", has been placed on eFOTG under Section II/Special Environmental Concerns/3. Conservation Planning Guidance.

The previous version of the Practice Effects Document, dated 12/22/06 has been archived.

**ACTION:**

Access eFOTG and download the updated document for use in completion of conservation planning activities. Discard any previously printed versions.

A handwritten signature in black ink, appearing to read "K. Woodrich" with "acting for" written below it.

KAREN A. WOODRICH  
State Conservationist
