

# **RUSLE2 Version 2.5.2.11 (Aug. 18, 2014)**

## **Instructions for exporting CNMP soil loss calculations (to be delivered to NRCS field office)**

**By: Tibor Horvath – Kentucky NRCS 859-224-7413  
Tibor.Horvath@ky.usda.gov**

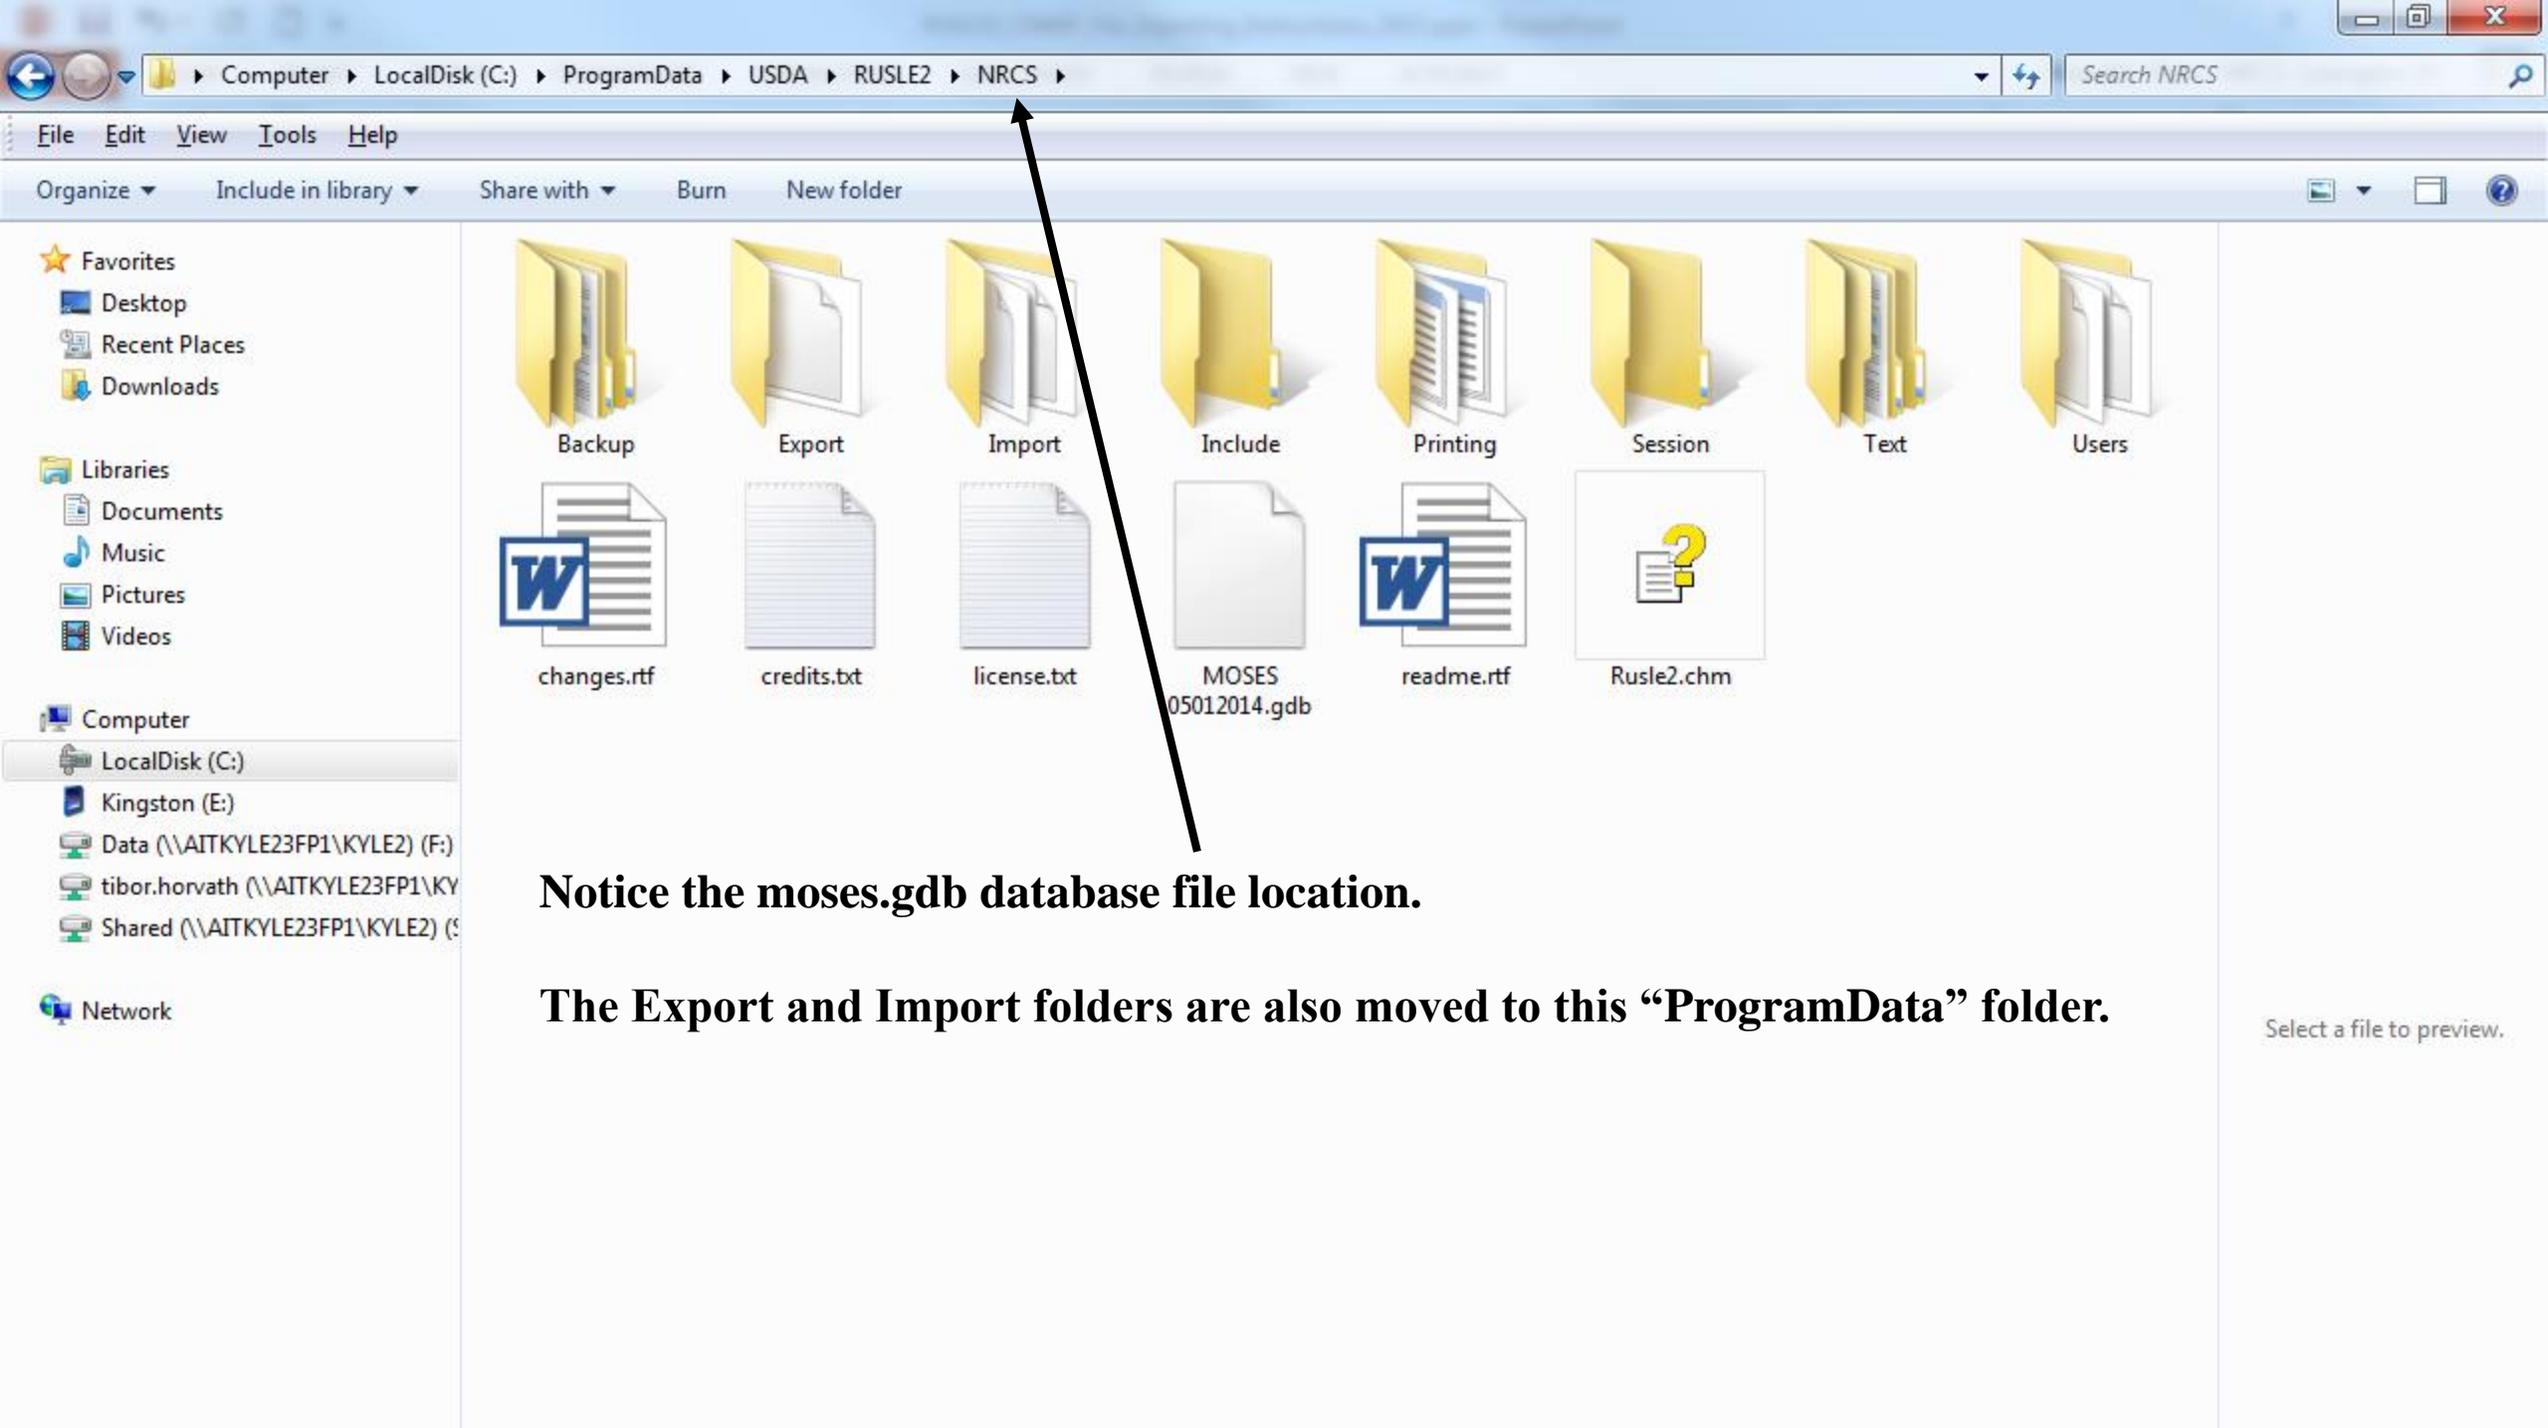

**This version of RUSLE2 has a different file structure on your computer. During installation it creates a “ProgramData” folder on your C: Drive and the moses.gdb database file will be located in this folder, while the executable file will be on the same location as used to be: C: - Program files(x86) – USDA – Rusle2 – NRCS folder. Unfortunately, on Windows 7 Home edition this folder remains invisible to the user, although it will be there.**

**The RUSLE2 executable file located in the NRCS folder**

**The moses.gdb database file is no longer in this location!**

**Notice the moses.gdb database file location.**

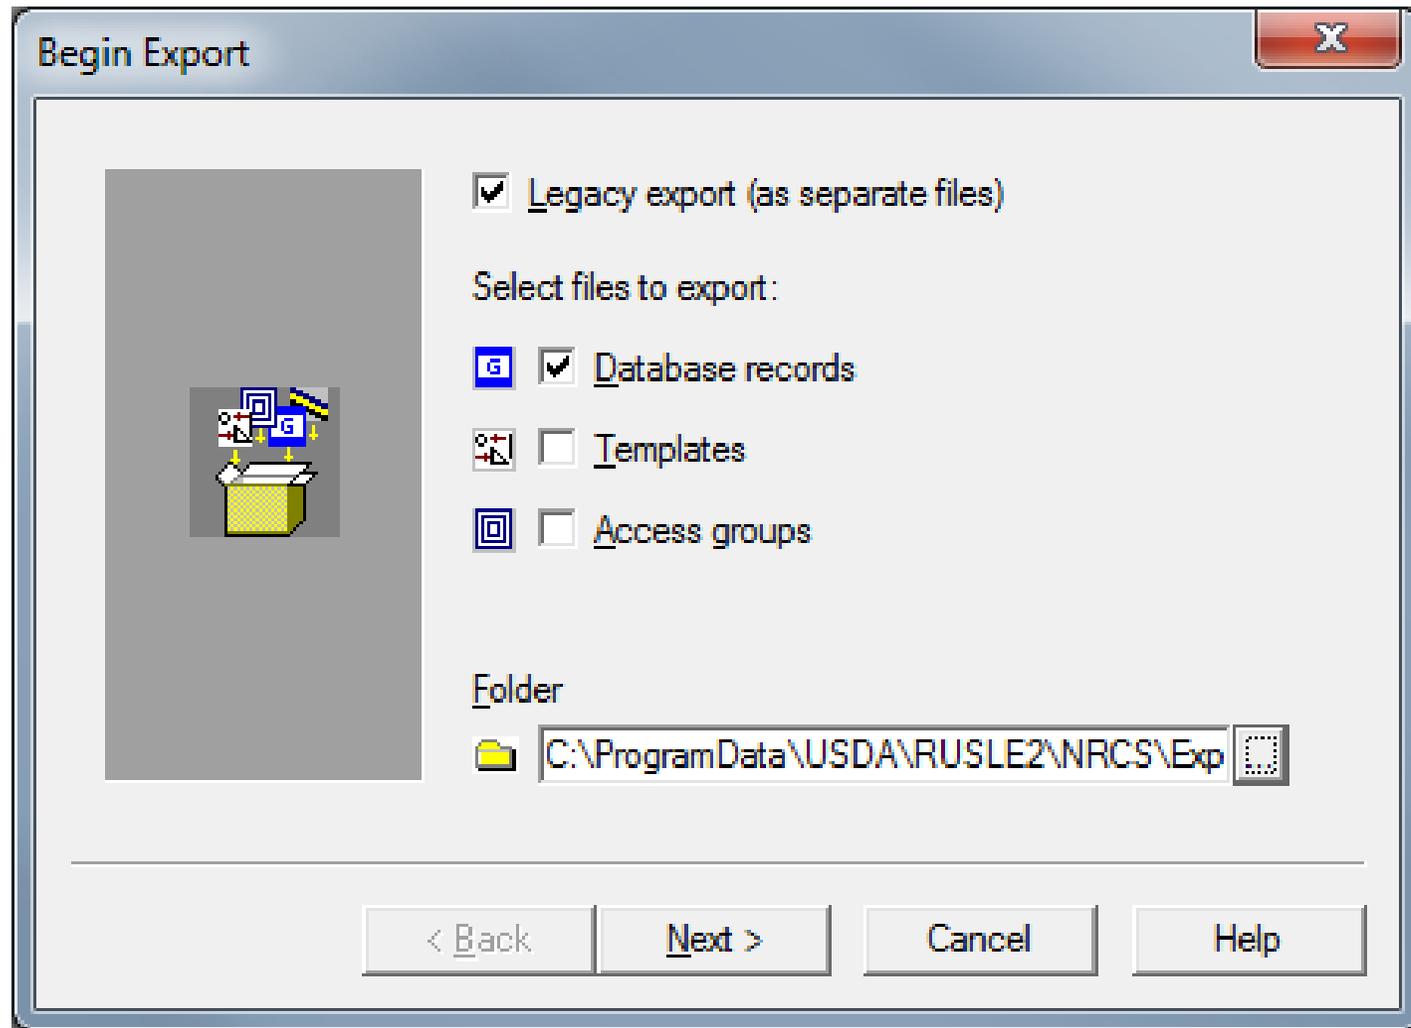

**The Export and Import folders are also moved to this “ProgramData” folder.**

Select a file to preview.

**If you were following the instructions explained in the RUSLE2 Rotation Builder Manual, and in the RUSLE2 Worksheet Manual, than these instructions will be very useful to correctly export RUSLE2 customer files into a small .gdb file.**

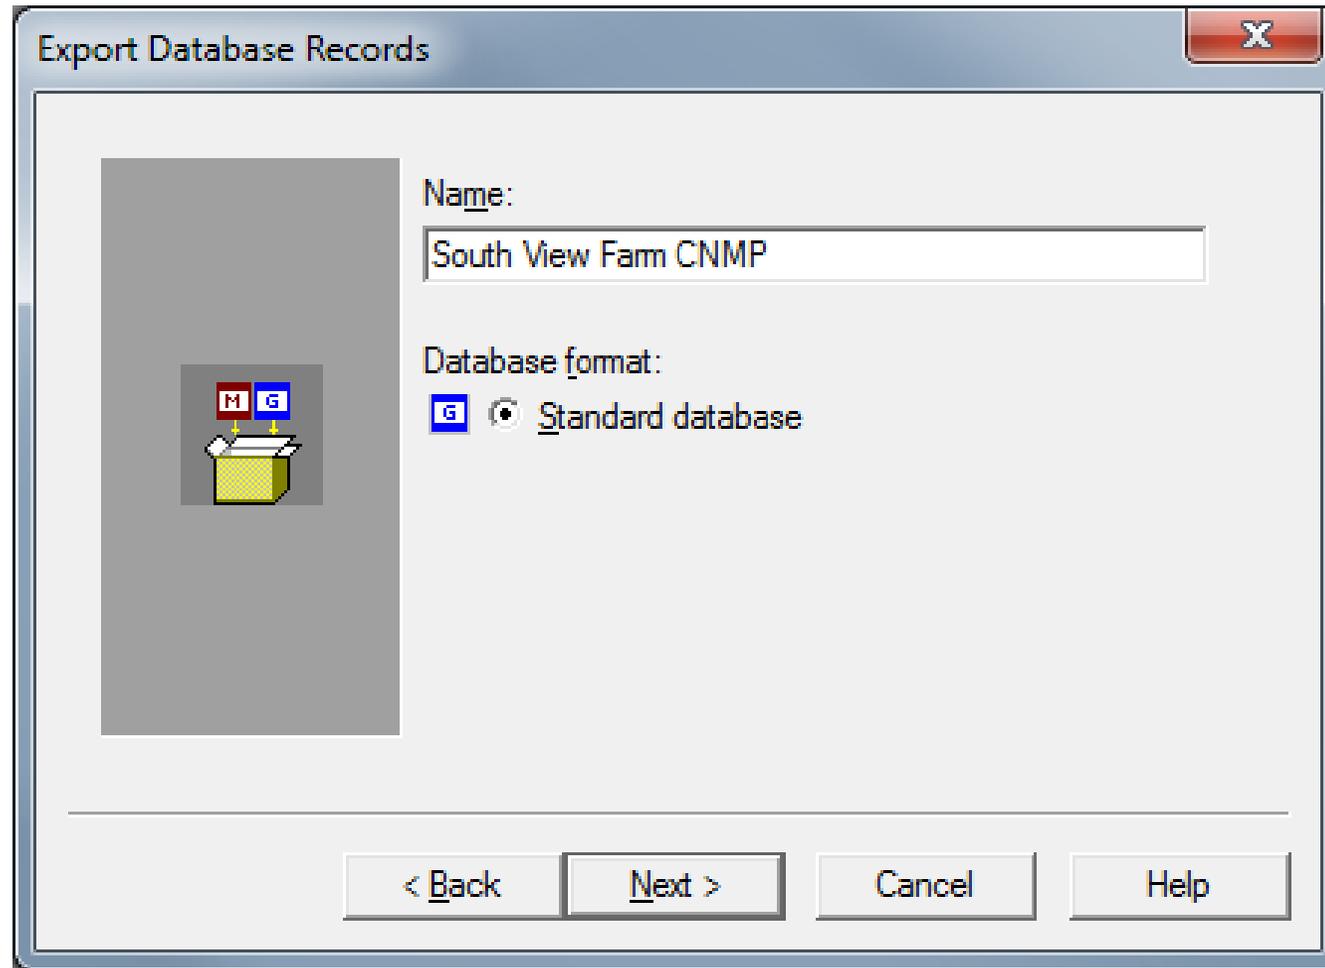

**First, click on the “Database” tab and select “Export with templates, access...”**

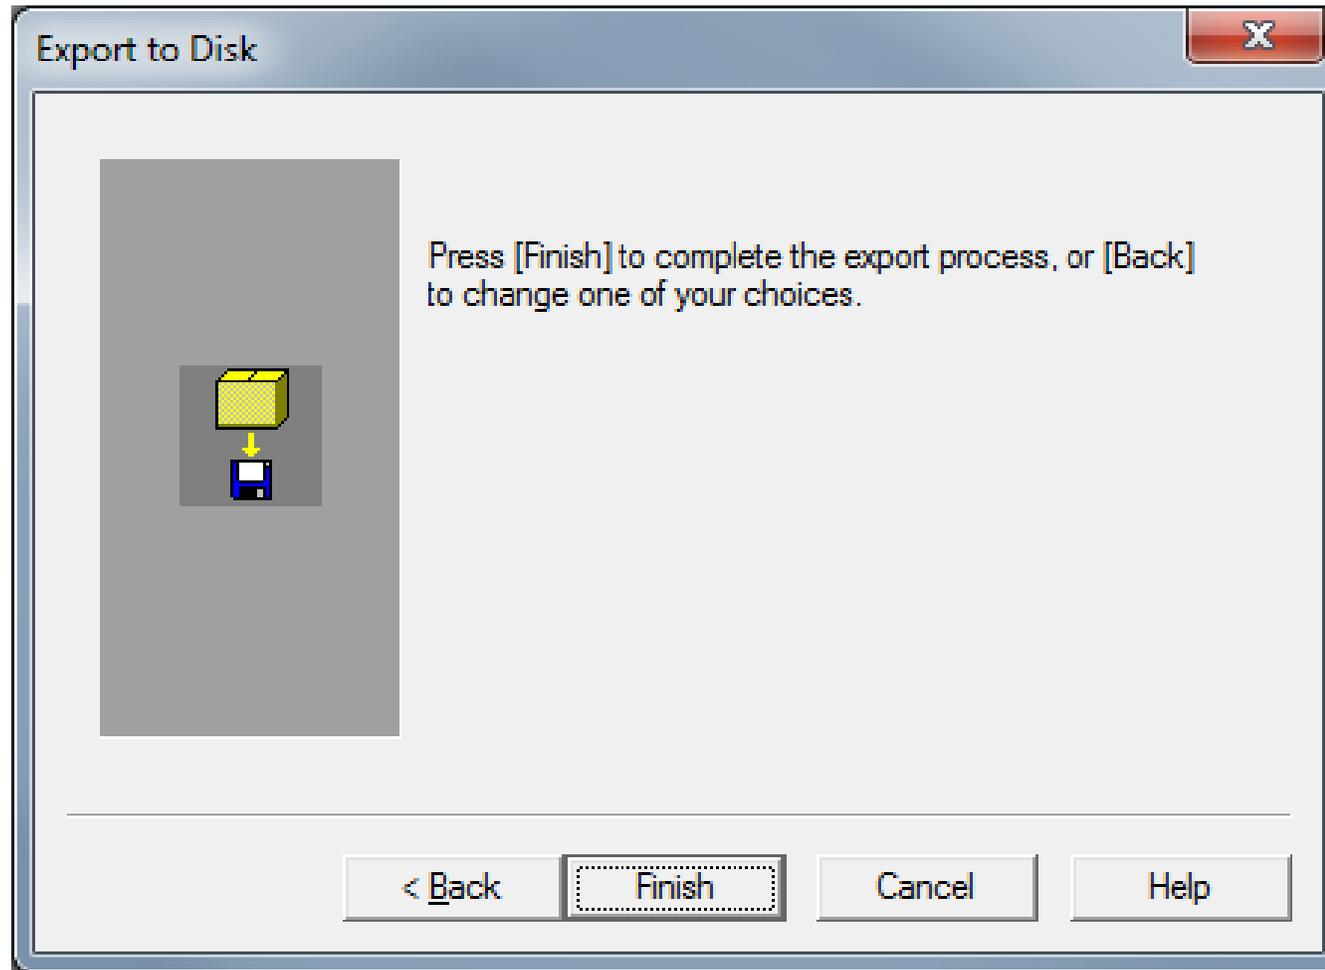

**Check the box in front of the “Database records” and make sure the destination folder is correct:**

**C: - ProgramData – USDA – RUSLE2 – NRCS – Export**

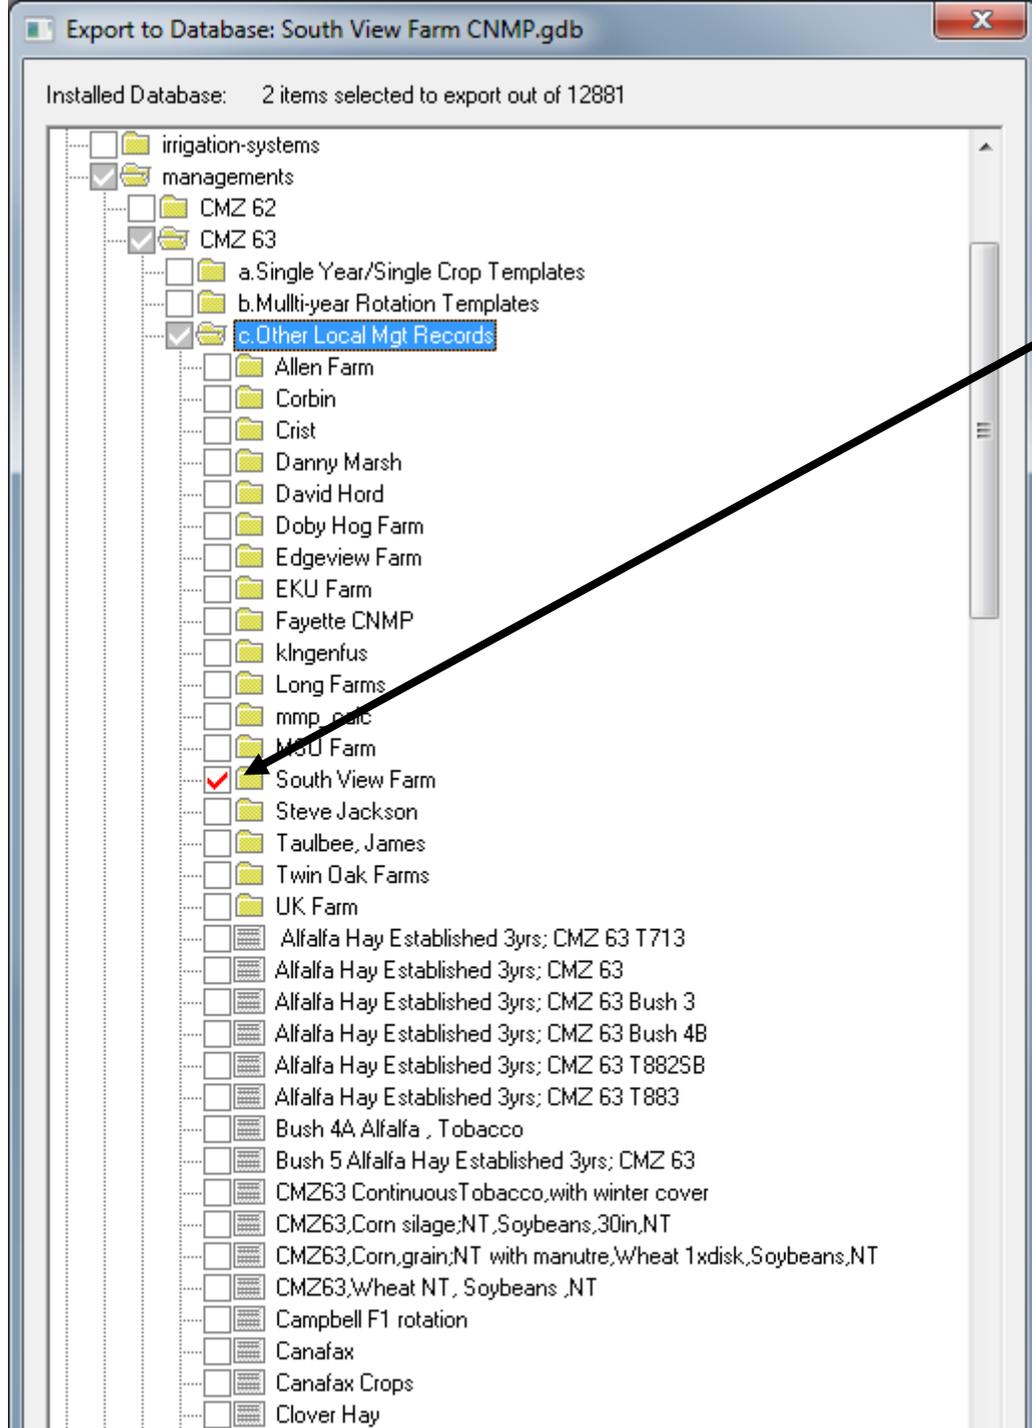

**Click on “Next >” when finished...**

**Type in the customer or farm name, then click Next >**

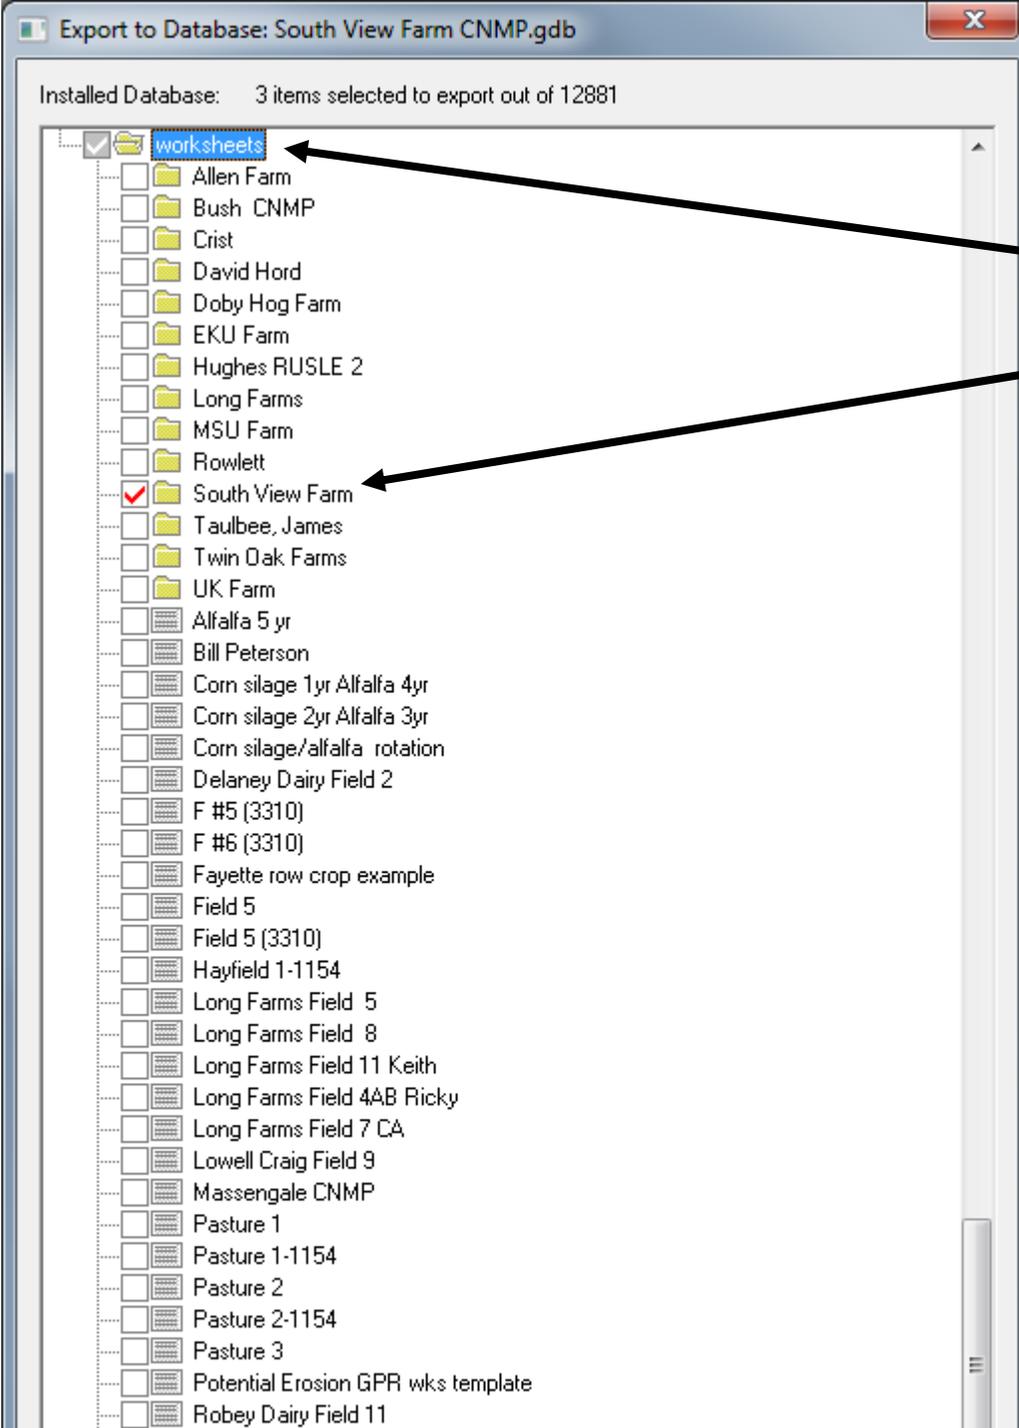

**Click on “Finish”**

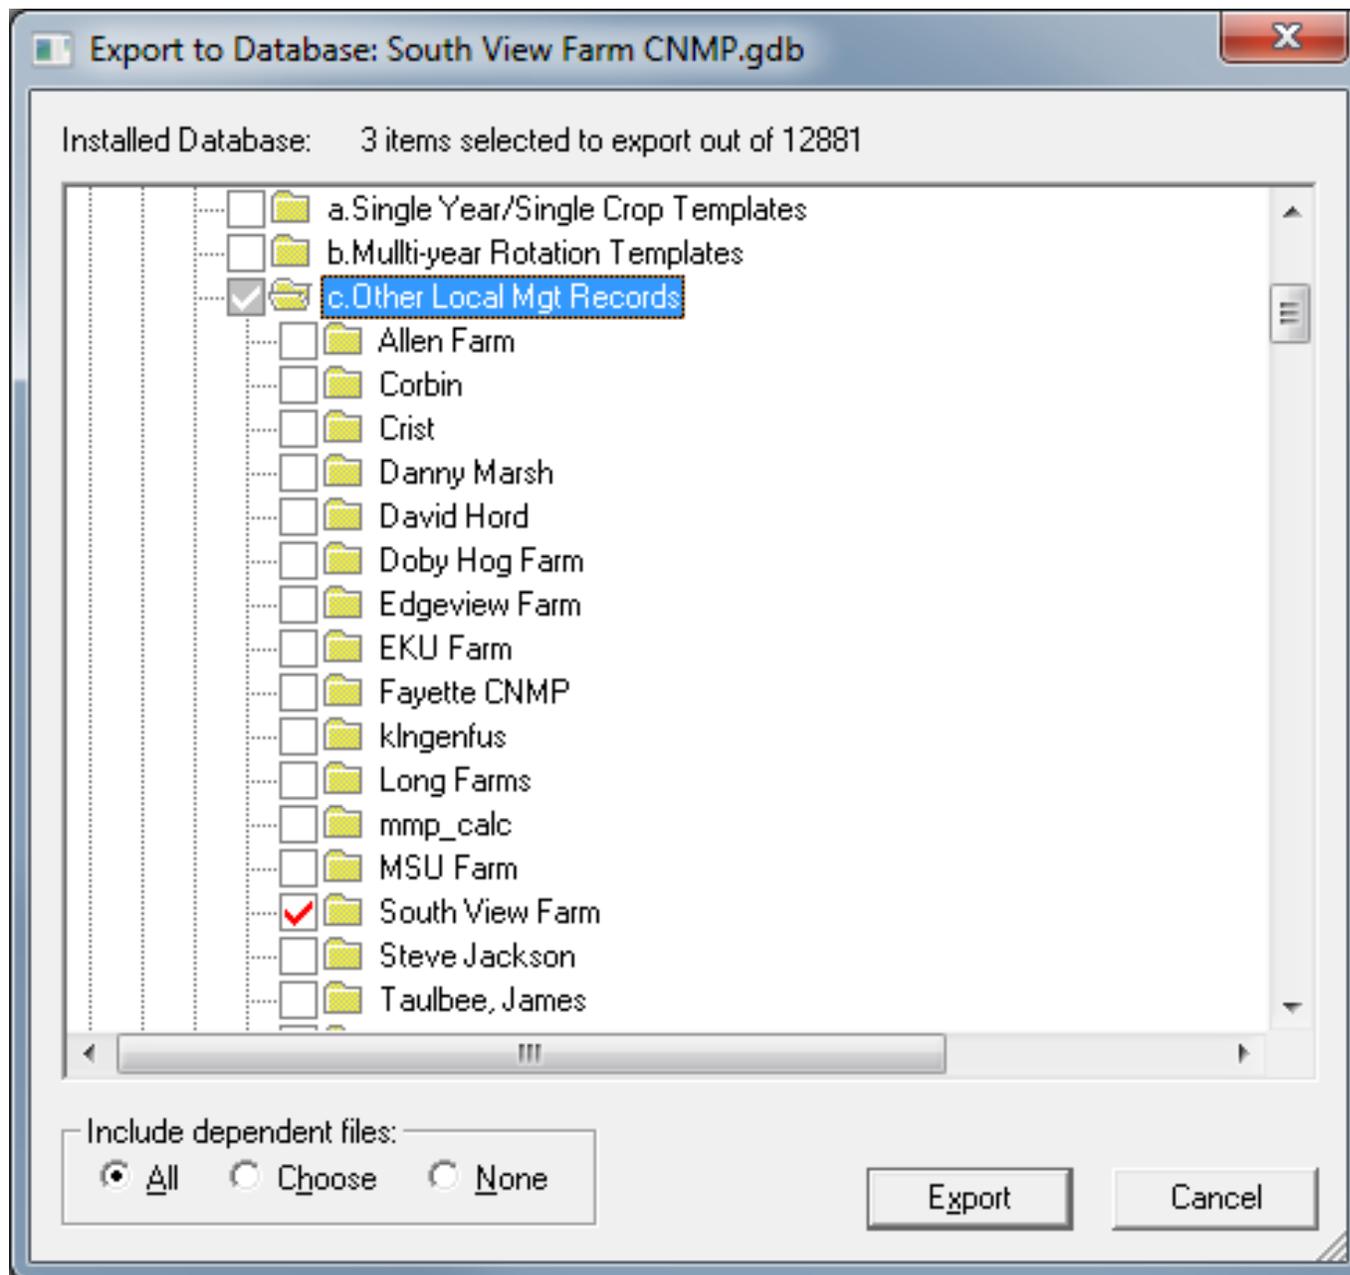

**Check the box in front of your client's folder under managements – and the CMZ folder where it is located under the c. Other Local Mgt Records.**

**This will export the crop rotations...**

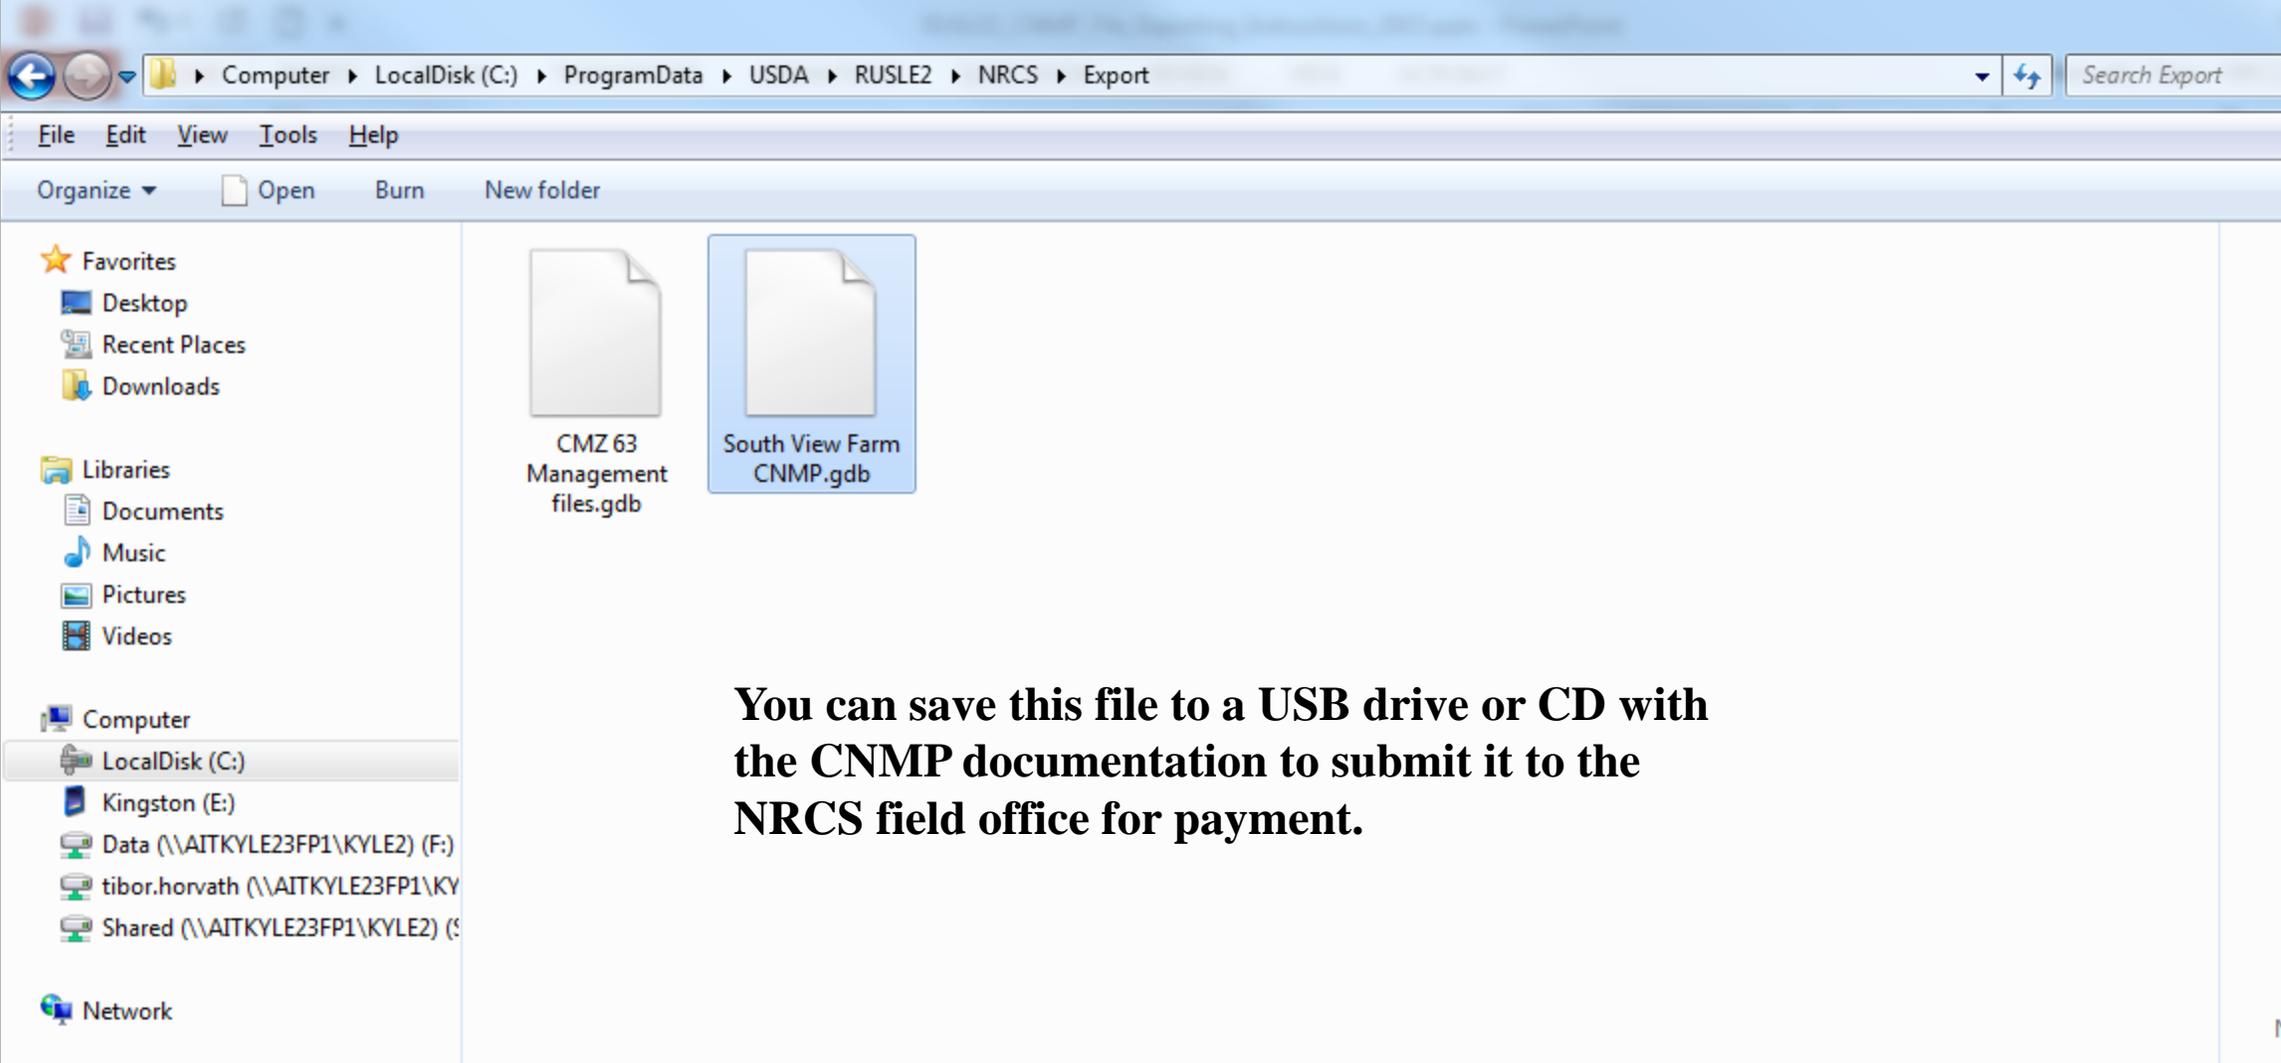

**Scroll down to see the worksheets folder and check the box in front of your clients worksheet folder...**

**Make sure the “All” box is checked for “Include dependent files:”**

**The export is finished. You can find the exported file under C: - ProgramData – USDA – RUSLE2 – NRCS – Export folder**

**You can save this file to a USB drive or CD with the CNMP documentation to submit it to the NRCS field office for payment.**
