Red-cockaded Woodpecker Priority Habitat - Conservation Programs Ranking Map (Northeast Section)

- Pink Mucket & Rabbitsfoot High Priority Habitat
- Pink Mucket & Rabbitsfoot Medium Priority Habitat
- Pink Mucket & Rabbitsfoot Low Priority Habitat
- Red-cockaded Woodpecker High Priority Habitat
- Red-cockaded Woodpecker Medium Priority Habitat
- CRP
- Ducks Unlimited Conservation Easement
- FmHA
- Mitigation Banks
- USFWS Partners for Fish & Wildlife
- WRP
- La Wildlife Management Area
- USFWS National Wildlife Refuge
- Parish Boundary

Red-cockaded Woodpecker Note: For a project area to qualify for RCW TE points, the landowner must commit to regular prescribed burning and thinning (as needed) to maintain a desirable herbaceous layer. At least 50% of the forest stand should be historically native pine managed at a basal area of less than 90 square feet per acre. Eligible practices should include historically native plantings at a stem density of less than 500 trees/acre with planned management as described above.

*** Ranking maps apply only to habitat restoration practices within conservation programs, unless targeted practices (as identified within the ESA section 7 Programmatic document) are confirmed.**

Pink Mucket & Rabbitsfoot Note:
 High Priority - Project area occurs directly to adjoining stream.
 Medium Priority - Project area occurs within 300 ft of stream.
 Low Priority - Project area occurs within watershed boundary.
