

SURFACE DRAINAGE, FIELD DITCH SPECIFICATIONS

NATURAL RESOURCES CONSERVATION SERVICE

EXCAVATION

The ditch shall be cut to the line and grade shown on the plans or as staked in the field.

SPOIL PLACEMENT

Spoil shall be spread and leveled so that the surface water can flow into the ditch. If the spoil is to be farmed, it shall be spread so that farming operations will not be hindered.

MAINTENANCE

Provisions shall be made for maintaining the ditches and their outlets to permit effective drainage.
