FIELD OFFICE TECHNICAL GUIDE

LOUISIANA NOTICE 450-224

Agronomy Technical Note Number 92, Estimating Nutrient Removal/Replacement in Crops and Forages, has been developed and is available in eFOTG in Section IV under conservation practice, Nutrient Management (590). Nutrients may be applied at replacement rates when soil test phosphorus and/or potassium levels are medium or higher on cropland or there is at least 60 percent vegetative cover of desirable/management species on grazing land. This technical note contains instructions for calculating nutrient replacement for cropland, hayland, and grazing land.

Questions and/or comments regarding the attached information should be addressed to Richard Aycock, Agronomist, at (318) 473-7805.
