**1/** These map units have slopes equal to or greater than 15 percent and are considered to be highly erodible lands. **ONLY** areas that are currently non-forested open farmed land IN PERMANENT VEGETATION (hay, pasture or blueberries etc.) are to be considered as additional farmland soils of local importance.

"Non-Forested Open Farmed Lands" is based on the most recent available imagery (aerial photos) in the Maine Ortho Imagery Viewer (on the Maine Office of GIS Website).
