

Tree/Shrub Site Preparation

Conservation Practice Job Sheet

ME-490

Definition

Treating areas to improve site conditions for establishing a forest.

Purpose

- Encourage natural regeneration of desirable woody plants.
- Permit artificial establishment of woody plants.

Where used

On all lands where establishment of woody plants is desired.

NOTE: The Tree/Shrub Establishment (Code 612) Job Sheet should **always** be used in conjunction with this job sheet.

Considerations

The method, intensity and timing of site preparation will match the limitations of the site, equipment, and the requirements of the desired woody species.

An appropriate site preparation method will be chosen to protect any desirable vegetation and cultural resources.

Remaining slash and debris shall not create habitat for or harbor harmful levels of pests.

Remaining slash and debris shall not hinder needed equipment operations or create an undue fire hazard.

Erosion and/or runoff will be controlled by appropriate erosion control practices.

Soil compaction and displacement will be minimized.

All chemicals will be applied in accordance with label guidelines.

Comply with applicable federal, state and local laws and regulations during the installation, operation and maintenance of this practice including "Maine's Best Management Practices Field Handbook by the Maine Forest Service and Erosion Control on Logging Jobs by the Land Use Regulation Commission (LURC).

The site preparation method should be cost effective and protect cultural resources, wildlife habitat, threatened and endangered species, water resources, and identified unique areas.

Visual quality objectives should be considered when selecting site preparation methods.

Anticipate possible off-site effects and modify the site preparation design accordingly.

Consider personnel safety during site preparation activities.

Operation and maintenance

Repair erosion control measures as necessary to ensure proper function. Access by vehicles during site preparation or after (i.e., before adequate tree and shrub establishment occurs) should be controlled to minimize erosion, compaction and other site impacts.

Specifications

Site-specific requirements are listed on the specifications sheet. Additional provisions are entered on the job sketch sheet. Specifications are prepared in accordance with the ME NRCS Field Office Technical Guide. See practice standard and Supplemental Specifications for Forest Site Preparation, code 490 for specific requirements.

Forest Site Preparation – Job Sheet

<i>Name:</i>	<i>County:</i>	<i>Town:</i>
<i>Field(s):</i>	<i>Farm #:</i>	<i>Tract #:</i>
<i>Designed By:</i>	<i>Approved By:</i>	
	<i>Signature:</i>	
<i>Date:</i>	<i>Date:</i>	

Purpose (check all that apply)	
Encourage natural regeneration of desirable woody plants	Permit artificial establishment of woody plants
Site Preparation for: (check all that apply) (Refer to ME Standard & Specification Forest Site Preparation, 490 for specific requirements)	
Natural Regeneration after harvest	Artificial Regeneration in undesirable forest or brush
Natural Regeneration for forested wetland restoration	Artificial Regeneration in field
Other	Other

Site Preparation Method (Refer to ME Standard & Specification Forest Site Preparation, 490 for specific requirements)				
Field	Acres	Method ¹	Date	Remarks

¹Specify method, - Options are:

Chemical - provide product name, strength and amount used, and purpose in remarks column (For recommendations refer to the most recent *New England Guide to Chemical Weed and Brush Control in Christmas Trees*)

Mechanical-hand (girdling or removing the outer bark of vegetation)

Mechanical-machine in Fields-mowing (used for abandoned pasture and cropland)/harrowing, disking or plowing (used for cleared areas, sodded areas and on areas lightly covered with brush)/subsoiling (mainly for white pine regeneration in fields with a plow-caused hardpan soil layer)/bedding (for high water tables, that are not wetlands)

Mechanical-machine in Brush and Woods-logging (disturbs soil)/chopping (used on brush and small tree diameter ≤ 5 inches)/shearing (used on vegetation diameter ≥ 8 inches)/blading (removal of all vegetation using a straight-blade dozer). Usually vegetation is pushed into contour windrows, especially if the area is to be planted by machine. Windrowing is usually an added expense and should be noted in the remarks column.

Prescribed burning – all burns must be conducted by personnel certified for prescribed burning and in accordance with all federal, state and local laws and regulations. (NRCS does not have this practice in Maine)

Shelterwood, Seed-tree or Clearcut harvesting systems Refer to ME Standard and Specification 490 for specific requirements.

NEPA requirements met, including cultural resource assessment? _____ Permits required? _____ Permit No. _____ (if Yes)

Questions regarding the planting or maintenance of the tree/shrub establishment should be directed to [name of technical specialist], at [phone number].

COMPLETION/CHECKOUT CERTIFICATION

I have job approval authority and certify this practice as applied meets NRCS Standards and Specifications:

NRCS Representative name and title (type or print):		
NRCS Representative Signature:		Date:
As-Built Notes (include date completed by client, treated acres and describe any changes to original design):		

Forest Site Preparation – Job Sheet

If needed, an aerial view or a side view of the practice can be shown below. Other relevant information, complementary practices and measures, and additional specifications may be included.

Scale 1"= _____ ft. (NA indicates sketch not to scale: grid size=1/2" by 1/2")

Additional Specifications and Notes: (Indicate from methods table field and acres corresponding to additional notes)

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication program information (Braille, large print, audiotape, etc.) should contact the USDA Office of Communications (202) 720-2791.

To file a complaint of discrimination write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

Forest Site Preparation – Job Sheet

LANDOWNER/OPERATOR ACKNOWLEDGES:

- a. They have received a copy of the specifications and understand the contents including the scope and location of the practice.
- b. They have obtained all necessary permits and/or rights in advance of practice application, and will comply with all ordinances and laws pertaining to the application of this practice.
- c. No changes will be made in the installation of the job without prior concurrence of the NRCS.
- d. Maintenance of the installed work is necessary for proper performance during the life of the practice.
The practice life is _____.

I have reviewed all specifications and agree to install as specified:

Landowner/operator name and title (type or print):		
Landowner/operator Signature:		Date:
