

List of Aroostook County, northeastern part, map units that meet the criteria for ME-CR1, question 3.b. when considering soil at APE.

Soils derived from fine sand, sand, gravelly sand or gravel:

Symbol	Map Unit Name
AgA	Allagash fine sandy loam, 0 to 2 percent slopes
AgB	Allagash fine sandy loam, 2 to 8 percent slopes
AgC*	Allagash fine sandy loam, 8 to 15 percent slopes
MaA	Machias gravelly loam, 0 to 2 percent slopes
MaB	Machias gravelly loam, 2 to 8 percent slopes
MaC*	Machias gravelly loam, 8 to 15 percent slopes
MbA	Madawaska fine sandy loam, 0 to 2 percent slopes
MbB	Madawaska fine sandy loam, 2 to 8 percent slopes
MbC*	Madawaska fine sandy loam, 8 to 15 percent slopes
SgA	Stetson gravelly loam, 0 to 2 percent slopes
SgB	Stetson gravelly loam, 2 to 8 percent slopes
SgC*	Stetson gravelly loam, 8 to 15 percent slopes

Alluvial Soils

Symbol	Map Unit Name
HaA	Hadley silt loam, level
HaB	Hadley silt loam, undulating
Wn	Winooski silt loam

\*Only the areas that have less than 10% slopes meet the criteria.

Notes: Map units not listed may have inclusions of these soils that meet the criteria.

Sandy ad hoc or spot symbols indicate areas too small to map that may meet the criteria.
