

## **Source for Official Soil Survey Information**

To provide public access to soil information, the Natural Resources Conservation Service (NRCS) established Web Soil Survey (WSS) where users can obtain the most current “Official Soil Survey Information.” Various soil reports can be selected, viewed, downloaded, and/or printed from WSS. Please refer to the “**Quick Guide to Web Soil Survey**” and “**Web Soil Survey Reports Directory**” documents located on eFOTG under the “\_County Reports” folder.
