Notes:

- ¹ This appendix should serve as a recommendation and may not apply to every possible situation. The person with Technical Job Approval Authority should use the above table as a guide to determine which installation certification statements are required.
- ² All licenses must be current and issued in the state of Minnesota for commercial construction.
- ³ Highly specialized or non-standard equipment may require additional certification from the equipment supplier or manufacturer.
- ⁴ All electrical components and equipment shall be listed by an organization approved by the state electric code. All installations must be inspected and approved in accordance with the Minnesota Electrical Act. Viewing and noting the electrical inspector's sticker shall be part of the certification process.
