MISSOURI TECHNICAL GUIDE TRANSMITTAL NO. 387

This transmittal provides information on companion documents for the Missouri Heritage Database adapted for NRCS use.

The following three documents have been posted on the Missouri eFOTG to compliment the use of the above database (*Documents 2 and 3 below are posted as Intranet files*):

- 1) Terms and Definitions – descriptions of a T&E species federal and state ranking for Missouri Species of Concern.
- 2) Location criteria for buffers used in the ArcView themes.
- 3) Missouri Natural Heritage Database Record Data Field Dictionary

Missouri Department of Conservation has proprietary rights to the Heritage database. NRCS is granted access to it under an agreement with MDC. We will periodically update the NRCS adapted database to keep it current with additions to the MDC source.

The Species Lists and Maps currently in use should remain in the file Tech. Dev. Appl. 450-11 Technical Guide Section I – T&E. This file will serve as an archive file for the T&E species information. The new ArcView file will be the current file for use.

If you have questions contact Pat Graham (573-876-0908).

Filing Instructions: The above three documents/links have been posted on the Missouri eFOTG under Section II - F. 1. Missouri Natural Heritage Database.

A handwritten signature in black ink that reads "Roger A. Hansen".

ROGER A. HANSEN
State Conservationist
