MISSOURI TECHNICAL GUIDE TRANSMITTAL NO. 431

The following revised Missouri standard and statement of work (SOW) has been posted on the Missouri eFOTG. The revised SOW is located in Section IV, under the related Conservation Practice.

Waste Utilization (633) – standard and statement of work

The Missouri practice standard has been revised to reflect changes in the national standard. The revision describes situations where the Nutrient Management (590) conservation practice standard provides technical guidance for land application of agricultural wastes.

Revised standards will be archived in Section I of the eFOTG under the appropriate year that the standard was revised.

Field offices should use SOWs for guidance on practice design, installation and documentation. If you have any questions regarding material in this transmittal, contact Glenn Davis, Agronomist (Nutrient Management), Columbia, Missouri.
