MISSOURI TECHNICAL GUIDE TRANSMITTAL NO. 452

The following Missouri conservation practice standard and statement of work has been posted on the Missouri FOTG:

- *Drainage Water Management (554)*

The Missouri Conservation Practice Standard for 554, Drainage Water Management, has been revised to reflect changes in the National Conservation Practice Standard. There are national revisions in almost every section. There are more detailed criteria related to water quality and manure application. The changes also exclude using this practice for subirrigation systems.

For questions regarding these conservation practice standards or the specification, contact Mari Gilford, Agricultural Engineer, State Office, Columbia, MO.

A handwritten signature in black ink that reads "Roger A. Hansen".
