MISSOURI TECHNICAL GUIDE TRANSMITTAL NO. 462

The following Missouri conservation practice Information Sheet has been posted on the Missouri FOTG. This Information Sheet is located in Section IV, under Management of Rare and Declining Habitats (643) and Upland Wildlife Habitat Management (645). It is also posted on the T: drive under NRCS\FTS_Section\Information Sheets.

- *Native Forb Information Sheet (IS-MO643F)*

The Native Forb Information Sheet (IS-MO643F) summarizes guidance for establishment and management of native forbs. Native forbs are an integral part of seed mixes in Restoration and Management of Rare and Declining Habitats (643) and Upland Wildlife Habitat Management (645).

Refer to Table 1 in this document for a list of approved native forbs and associated information such as habitat types, blooming periods, and importance to pollinators. This information is critical when selecting a seeding mixture that will provide habitat for a particular group of wildlife, such as native pollinators or quail and other grassland species. This information sheet supports Restoration and Management of Rare and Declining Habitats (643) and Upland Wildlife Habitat Management (645).

If you have any questions regarding the Native Forb Information Sheet (IS-MO643F), please contact Chris Hamilton, State Biologist, State Office, Columbia, MO.

A handwritten signature in black ink that reads "J.R. Flores".
