MISSOURI TECHNICAL GUIDE TRANSMITTAL NO. 488

The following Missouri conservation practice information sheet has been posted on the Missouri eFOTG in Section IV, under D. Practice Specifications – Vegetation Establishment:

- *Converting Pasture and Hayland from Toxic Endophyte Infected Fescue to Non-Toxic Grasses (IS-MO723C)– Information Sheet*

This information sheet provides more information on the process to be used when converting pasture and/or hayland from toxic endophyte infected fescue to non-toxic grasses. This process will be used for all programs.

If you have any questions regarding Converting Pasture and Hayland from Toxic Endophyte Infected Fescue to Non-Toxic Grasses (IS-MO723C) Information Sheet, contact Mark Kennedy, State Grassland Conservationist, Houston, Missouri.

A handwritten signature in black ink that reads "J.R. Flores". The signature is fluid and cursive.

J.R. FLORES
State Conservationist
