MISSOURI TECHNICAL GUIDE TRANSMITTAL NO. 529

Three nationally approved Ecological Site Descriptions (ESDs) for Major Land Resource Area (MLRA) 116C (St. Francois Knobs and Basins) have been completed and are now available. They are:

- Igneous Upland Woodland – F116CY002MO
- Dry Igneous Upland Woodland – F116CY003MO
- Shallow Igneous Knob Glade – R116CY006MO

Field offices and the general public can now access these documents through the Ecological Site Information System page (<https://esis.sc.egov.usda.gov/>). Choose Ecological Site Description (ESD) > Approved ESD Reports (upper left) > MLRA (choose 116C) > Submit > choose desired ID number > complete report (lower left).

Reformatted versions of these ESDs are also available on the Missouri Field Office Technical Guide > Section II > Ecological Site Information > Ecological Site Descriptions > 116C > F116CY002MO, F116CY003MO, or R116CY006MO.

If you have any questions regarding the material in this transmittal, please contact Jorge Lugo-Camacho, State Soil Scientist or Dwaine Gelnar, State Resource Conservationist, Columbia, Missouri.
