MISSOURI TECHNICAL GUIDE TRANSMITTAL NO. 562

The following Missouri Job Sheet and Information Sheet have been posted on the Missouri Field Office Technical Guide under Section IV > Conservation Practices:

- *Brush Management (JS-MO314) – Job Sheet*
Job sheet had minor changes to include adding WinPST mitigation index score and mitigation techniques and practices to the Schedule of Treatments table.
- *Brush Management (IS-MO-314) – Information Sheet*
Information sheet was created to provide guidance to distinguish sites that are eligible for brush management from sites where the woody vegetation has advanced to the point where treatment would result in a land use change.

If you have any questions regarding the material in this transmittal, please contact Nate Goodrich, State Forester, Columbia, Missouri.
