

STATEMENT OF WORK
Waste Recycling (633)
MISSOURI

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN**Deliverables:**

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices
 - a. Practice purpose(s) as identified in the conservation plan.
 - b. List of required permits to be obtained by the client
 - c. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to:
 - i. Results of applicable sampling, analyses and tests provided by the client
 - ii. Planned waste utilization
 - iii. Additional requirements applicable to agricultural wastes, including:
 1. protection of water quality
 2. protection of air quality
 3. providing fertility for crop, forage, fiber, and forest production
 4. improving soil structure
 5. providing feedstock for livestock, and
 6. providing a source of energy
2. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to implement the practice and obtain necessary permits.
3. Operation and maintenance plan
4. Certification that the design meets practice standard criteria and comply with applicable laws and regulations
5. Design modifications during implementation as required

INSTALLATION**Deliverables**

1. Pre-application conference with client
2. Verification that client has obtained required permits
3. Facilitate and implement required design modifications with client and original designer
4. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation
5. Certification that the application process and materials meets design and permit requirements

CHECK OUT**Deliverables**

1. Records of application
 - a. Extent and location of practice units utilized
 - b. Actual materials used
 - c. If wastes are land-applied, provide documentation for proper application and nutrient planning according to the Nutrient Management (590) conservation practice standard.
2. Certification that the installation meets NRCS standards and specifications and is in compliance with permits
3. Progress reporting
