## List of Federally Threatened and Endangered Species by County

August 2016

**Codes: E = Endangered**  
**CH = Critical Habitat**  
**T = Threatened**

**C = Candidate**  
**P = Proposed**

The following list contains species that are known to occur in Mississippi. It includes historic range information, known species locations, as well as the “Section 7 range” or “Area of Influence” of a species population which identifies the area within which, if an action is proposed, potential effects to this species should be considered.

**NOTE:** The brown pelican (*Pelecanus occidentalis*) was delisted in 2009 but the pelican is still protected by the Migratory Bird Treaty Act. The American bald eagle (*Haliaeetus leucocephalus*) was delisted in 2007 but nesting eagles and their nest trees are still protected under the Bald and Golden Eagle Protection Act. The Louisiana black bear (*Ursus americanus luteolus*) was delisted in 2016.
