

## MAPS

**Map 1. Critical habitat for Canada lynx, Unit 3 – Northern Rockies (from final rule designating critical habitat; USDI 2009).**

**Map 2. Critical habitat for Canada lynx, Unit 5 – Greater Yellowstone (from final rule designating critical habitat; USDI 2009).**

**Map 3. Canada lynx recovery areas in the contiguous United States, depicting core, secondary, and peripheral areas in Montana. (Map compiled by USFWS, Bismarck, ND, June 14, 2005. All features are for representative purposes only and may not depict the actual size, shape and/or boundary.)**

**Map 4. Potential Canada lynx habitat in Montana. Potential lynx habitat on private and public lands modeled by combining forested lands (Land Cover dataset) with elevations above 4,000 feet (USGS 30 m Digital Elevation Model). Potential lynx habitat on National Forest System lands was further refined using timber stand and fire history data.**
