

Seeding Depth	Lime and Fertilizer
Planting Method	
Weed Control Measures During Establishment (Timing and Methods)	

Notify the NRCS or SCD office when the planting is completed.

HERBACEOUS SEED MIXTURE				
Location(s)	Species and Cultivar or Mix[‡]	Acres	Seeding Rate	Total Seed Quantity

[‡] If specifying only a mix, attach a copy of the mix.

OPERATION AND MAINTENANCE

- Inspect firebreaks at least annually, and rework bare ground firebreaks to keep them clear of flammable vegetation. Remove woody materials, such as downed limbs and branches, from firebreaks.
- Mow, disk or graze vegetated firebreaks to avoid build-up of excess litter and control woody vegetation.
- Inspect vegetated firebreaks for plant health and survival, and invasive and undesirable species.
- Inspect firebreaks for erosion and functioning of erosion control measures.
- Do not disturb the planting during the primary nesting season of April 15 – August 15, unless otherwise recommended.

- Control noxious weeds and other invasive plants by spot treatment using mechanical methods or approved herbicides. If it becomes necessary to control noxious weeds during the nesting season, contact your local weed control specialist concerning recommendations for spot-treating the weed problem.
- Maintain **herbaceous** planting areas according to the specifications below:

Method: _____
 Frequency: _____
 Timing: _____
