

**NATURAL RESOURCES CONSERVATION SERVICE
CONSERVATION PRACTICE SPECIFICATION**

ACCESS ROAD

CODE 560

SPECIFICATIONS

Construction operations shall be carried out in a manner that erosion and air and water pollution is minimized and held within legal limitations. The completed job shall present a workmanlike finish. Construction shall be according to the following requirements as specified for the job:

- 1) Trees, stumps, roots, brush, weeds, and other objectionable materials shall be removed from the work area.
- 2) Unsuitable material shall be removed from the roadbed area.
- 3) Fill material shall be deposited in layers not to exceed 9 inches and compacted with the controlled movement of compacting and earthmoving equipment.
- 4) The roadbed shall be graded to the required elevations. When specified treatment of the road surface is required, subgrade preparation and placement of the surface course shall be in accordance with sound highway construction practice for the surface material used.
- 5) Structures such as culverts, pipe drops, or bridges shall be installed to the lines and grades shown on the plans or as staked in the field. Pipe conduits shall be placed on a firm foundation. Selected backfill material shall be placed around the conduit in layers not to exceed 6 inches. Each layer shall be properly compacted.
- 6) Roads shall be planned and laid out according to good landscape management principles.
