

**NATURAL RESOURCES CONSERVATION SERVICE  
CONSERVATION PRACTICE SPECIFICATION  
RECREATION LAND GRADING AND SHAPING  
CODE 566**

**SPECIFICATIONS**

**CONSTRUCTION**

Special attention shall be given to saving and maintaining key trees and other vegetation that have scenic value, provide shade, reduce erosion and runoff, provide den and food for wildlife, or add to the visual quality of the areas.

Special features to control erosion and handle increased runoff shall be incorporated as required.

Safety features, considering use to be made of the area, shall be planned.

Measures and construction methods that enhance fish and wildlife shall be incorporated as needed and practical.

**OVERALL QUALITY AND  
WORKMANSHIP**

Construction operations shall be carried out in such a manner that erosion and air and water pollution are minimized and held within legal limits. The completed job shall present a workmanlike finish.
