TECHNICAL GUIDE NOTICE ND-109

This notice transmits revisions to the Field Office Technical Guide (FOTG) as follows:

Section I:

An updated LaMoure County Irrigation Workbook has been posted to Section I – Cost Data – EQIP Irrigation subfolder.

Section II:

Section II – Soil Information subfolder has been revised. The *Soils Information for “County Name”* document replaces the electronic report links previously listed in each county folder. The new document contains county specific links and instruction for generating electronic reports from the Soils Data Mart (SDM) and Web Soil Survey (WSS). The second and third pages of the document list the reports available for North Dakota counties.

Section IV:

Conservation practice standards 521D – Pond Sealing or Lining, Compacted Clay Treatment and 632 – Solid Liquid Waste Separation Facility have been added to the National Handbook of Conservation Practices Standards. These national standards have been adopted by North Dakota and are posted in eFOTG – Section IV – Conservation Practices subfolder.

Questions concerning the soils information documents may be directed to Steve Sieler at (701) 530-2119 or steve.sielier@nd.usda.gov. Questions concerning conservation practice standards may be directed to Wesley Wiedenmeyer, State Conservation Engineer, at (701) 530-2086 or wes.wiedenmeyer@nd.usda.gov.
