

Animal Enhancement Activity – ANM11 – Patch-burning to enhance wildlife habitat

State Criteria

- Two burn treatments during a five year period are required in all counties east of the Panhandle (Vegetative Zones II, III, and IV). Only one burn treatment in a five year period is required in the 11 Panhandle counties (Vegetative Zone I) due to reduced, historic fire frequency.
- Burning should not be conducted during peak nesting season: May 1 – July 15.

DOCUMENTATION REQUIREMENTS:

Identify wildlife management objectives: _____

(Example: A wide variety of structural habitat types will be present to benefit a wider array of grassland-nesting birds including those that rely on tall, dense cover such as Henslow’s sparrow and bobolink as well as those that rely on short, sparse cover such as McCown’s longspur and horned lark.)

Complete the Table below:

To be completed by NRCS and Producer during planning					To be completed by Producer during certification		
1	2	3	4	5	6	7	8
Tract	Pasture	Total Acres	Percent to be Burned	Timing of Burn (month/year)	Applied Acres Burned	Applied Percent Burned	Dates Burned (Month/Year)
<i>Ex. 99</i>	<i>R4</i>	<i>160</i>	<i>25%</i>	<i>Nov./2011</i>	<i>50 Ac</i>	<i>31%</i>	<i>Oct. 2011</i>

EX= EXAMPLE, COLUMNS 1-5 NRCS COMPLETES, COLUMNS 6-8 PRODUCER COMPLETES

I certify that the patch-burning for wildlife habitat meets these specifications including the following documentation as applicable:

1. Attach a grazing management plan that identifies the elements shown on #5 d.-f. of previous page.
2. Attach a prescribed burning plan that identifies the elements shown on #6 of previous page.
 Note: These plans can describe those required elements using text, tables, and/or maps.
3. Map(s) with patch-burning areas, including locations, acres, season and year of burns, clearly identified (highlighted, outlined, etc.)

Certified by: _____ **Date:** _____
