NE-ANM18 2012 Ranking Period 1

**Animal Enhancement Activity – ANM18 – Retrofit Watering Facility for Wildlife Escape**

**State Criteria (same as NATIONAL CRITERIA)**

**Additional Criteria for Nebraska**

One structure (ramp) is required for every 30 linear feet of tank/trough edge. A tank with 59.9 feet or less of tank perimeter requires one ramp. Tanks with 60 feet of perimeter up to 89.9 feet require two ramps, and so forth. For square or rectangle tanks, simply add the outside dimensions. For round tanks, X feet of diameter multiplied by 3.14 provides the circumference. (Example: a 10 foot diameter tank has a circumference of 31.4 feet.)

A ramp is not required on the outside of the tank to meet the requirements of this enhancement.

**Documentation Requirements (SEE NATIONAL ENHANCEMENT ACTIVITY JOBSHEET)**

Complete the Table below:

1	2	3	4
Tract	Field(s)	Planned Number of watering facility retrofits	Applied Number of watering facility retrofits
<i>Ex. 100</i>	<i>R1</i>	<i>1</i>	<i>1</i>

EX= EXAMPLE, COLUMNS 1-3 NRCS COMPLETES, COLUMN 4 PRODUCER COMPLETES

**I certify that the enhancement criteria have been met and the required documentation provided to NRCS.**
