

Water Quantity Enhancement Activity – WQT10 – Center pivot irrigation end gun removal

State Criteria (same as NATIONAL CRITERIA with the following clarifications)

Implementation of this enhancement requires compliance with the Nebraska Practice Documentation Requirements for Conservation Practice Standard, [Irrigation Water Management \(PDR-449\)](#)

End guns cannot be replaced with other water distributing appurtenances (e.g. dump valves).

Documentation Requirements (SEE NATIONAL ENHANCEMENT ACTIVITY JOBSHEET)

Complete the Table below:

To be completed by NRCS and Producer during planning			To be completed by Producer
1	2	3	4
Tract	Field(s)	No. of Pivot Systems Planned	No. of Pivot Systems Applied

NRCS completes column 1, 2 & 3 (Tract, Field and No. of Pivot Systems Planned). Participant completes remaining column.

Participant Acknowledgement Statement:

I agree to apply this enhancement under the terms and conditions of my CSP contract and understand the requirements of the activity.

I certify that I have implemented this enhancement by removing the end gun(s) on the field(s) listed in the table above as well as the following documentation as applicable:

1. Photo documentation showing removal of the center pivot end gun(s) and subsequent pivot operation.
2. [Nebraska Planning Sheet 17](#) has been completed.
3. Maps/inventory delineating the location(s) where enhancement was implemented.
