

INSTRUCTIONS FOR USE OF

NEBRASKA CONSTRUCTION SPECIFICATION

(NE-214) - CATHODIC PROTECTION FOR BURIED METAL STRUCTURES

1. APPLICABILITY

Construction Specification NE-214 is applicable to structures built in "hot" soils, using corrugated metal pipe for the principal spillway. This is particularly applicable in the northern tier of counties along the South Dakota border but it can apply to other parts of the state as well.

2. MATERIAL SPECIFICATIONS

There are no material specifications associated with Construction Specification NE-214. All material requirements are included in Specification 214 or on the standard drawing.

3. ITEMS TO BE INCLUDED ON SPECIFICATIONS AND/OR DRAWINGS

Quantities of anodes (number), cable (feet), test boxes (number), galvanized pipes (each), treated posts (number), and couplings and welds (number). Use the table of quantities on Standard Drawing No. 5005.1 "Cathodic Protection System".

See EFM, Appendix 2, for standard drawings.
