

INSTRUCTIONS FOR USE OF

NEBRASKA CONSTRUCTION SPECIFICATION

(NE-21) - EXCAVATION

1. APPLICABILITY

Construction Specification NE-21 is applicable to all types of excavation. It may be applied to the excavation required for core trenches, emergency spillways, outlet channels, supply channels, ditches, pipe trenches, surface drains, borrow areas and other similar types of excavation.

2. MATERIAL SPECIFICATIONS

There are no material specifications complementary to Construction Specification NE-21.

3. ITEMS TO BE INCLUDED IN SPECIFICATIONS AND/OR DRAWINGS

- A. Dimension, depths, and limits of excavation.
- B. Boring or test pit logs including water table elevations and dates of observation.
- C. If rock excavation is required, use PL-46 construction specification 21.
- D. If pay limits for excavation need to be identified, use PL-46 construction specification 21.
- E. The location and limits of borrow areas and waste areas, if applicable.
- F. Special requirements for dewatering and keeping the excavation dry, if applicable.
- G. Special requirements for control of erosion, water pollution, and air pollution, if applicable.
