GENERAL INFORMATION:

Background Conservation Plan/Casefile Information is documentation that is gathered or prepared by the conservation planner during the first 7 steps of the conservation planning process (refer to the National Planning Procedures Handbook (NPPH) for details. This information should be included in the client's casefile. While information within a client's casefile is subject to the Freedom of Information Act (FOIA), the client may sign a waiver which would allow access of this material to a Technical Service Provider or other interested party as designated by the client.

Practice Design, Installation and Checkout Requirements are documentation deliverables that apply to the individual practice. Design, Installation and Checkout are categories of technical assistance which can be completed and submitted separately for certification.

Use of this Form: This form will be used as a checklist for verification of practice design, installation and checkout deliverables, items that are checked are required to be documented.

Documentation submittal: Submit this form along with completed documentation deliverables as indicated for each category of technical assistance to NRCS. All documentation must be provided before work can be submitted for payment.
