

**NATURAL RESOURCES CONSERVATION SERVICE
CONSERVATION PRACTICE STANDAR**

STREAM CHANNEL STABILIZATION

CODE 584S

Measures and construction methods that enhance fish and wildlife values shall be incorporated as needed and practical. Special attention will be given to protecting and maintaining key shade, food, and den trees and to stabilization of disturbed areas.

Removal of any trees and brush required will be done in such a manner as to avoid damage to other trees and property.

Removal of any trees, brush, and other material will be done in such a way as to have the least detrimental effect on the environment.

Construction operations shall be carried out in such a manner that erosion, and air, and water pollution will be minimized and held within legal limits.

The completed job shall present a workmanlike finish.

Conservation practice standards are reviewed periodically, and updated if needed. To obtain the current version of this standard, contact the Natural Resource Conservation Service.
