

INSTRUCTIONS FOR USE OF

NEBRASKA CONSTRUCTION SPECIFICATION

(NE-92) - FENCING

1. APPLICABILITY

Construction Specification NE-92 is applicable to the construction of any and all permanent type farm field fences that are designated as part of a project or needed to complete a conservation practice. It may be applied to fence requirements for protecting emergency spillways, outlet channels, water supply channels, wildlife enhancement plots, windbreaks and shelterbelts, new seedings for grassland rehabilitation, waste storage facilities and ponds, wildlife ponds, dugouts in fragile areas, and other similar items.

2. MATERIAL SPECIFICATIONS

There are no material specifications complementary to Construction Specification NE-92. All material requirements are included in the construction specification.

3. ITEMS TO BE INCLUDED IN SPECIFICATIONS AND/OR DRAWINGS

- A. Plan layout showing location of fence and gates to be constructed.
- B. Specify type of fence to be installed (woven wire, barbed wire, electric, etc.).
- C. Indicate quantity on drawings, if known.
- D. Select the appropriate standard drawings from EFM, Appendix 2.
