

## PART 503 - SAFETY

### SUBPART A - ENGINEERING ACTIVITIES AFFECTING UTILITIES

503.02(e)

§NE503.02(d) General considerations.

Nebraska's One-Call Law identifies contractors as "excavators" on a project. By law, excavators have the entire responsibility for notifying the one-call vendor.

The NRCS will include the legal description on every set of drawings or data sheets developed for construction. The legal description should include the range, township, section, and quarter section. The NRCS should also include a note or stamp on these drawings and data sheets which serves as a reminder to contractors to comply with the One-Call Law.

§NE503.02(e) General considerations.

As of October 2, 1995, NRCS Nebraska will not change the county utility maps. Field offices will not add any utility locations to these maps as of October 2, 1995. Display of the utility maps is not required.
