

## PART 512 – CONSTRUCTION

### SUBPART D - INSPECTION OF CONSTRUCTION WORK

NE512.32(b)

§NE512.32(b) Inspection procedures

(b) The degree of construction inspection needed for any practice is to be determined by the person with the design approval authority for the practice listed on Form NE-EN-14. Guidance for minimum inspection is given in NCPM Exhibit NE507.10 for the standard practices of Class IV and smaller capacity.

(c) The state conservation engineer will determine who can be given the construction inspection responsibility for Class V through Class VIII jobs. Assigned construction inspection responsibility shown on NE-EN-14 will not exceed Class V. For all Class VI and higher jobs, the state conservation engineer will review the qualifications necessary and approve the appointment(s) in writing before construction begins.
