

Nebraska NRCS Species By County

Use to answer Step 1. of the NE-CPA-52 Endangered and Threatened Species Guide Sheet.

This table of species by county is based on the "Range maps for listed species in Nebraska, compiled and edited by the Nebraska Natural Heritage Program, November 2011." The map product was based on documented occurrences of listed species and expert knowledge about the distribution of species and suitable habitat. For a given county-by-species combination, the range of the given species covers some portion (from all to very little) of the county. The individual species range map needs to be reviewed to determine if a particular area of potential effect for the action is within the species's range.

For species information see links given below:

Species List by County. May use maps to further define (eFOTG Section II): <http://efotg.nrcs.usda.gov>

Species specific information (eFOTG Section II): <http://efotg.nrcs.usda.gov>

General species information can be found at the following links: [Nebraska's Natural Legacy Project](#)

Any of the state species of concern that are also listed federally as endangered, threatened, or proposed are addressed in the Federal species section.

Federally Listed Species

E = Endangered

T = Threatened

P = Proposed for listing

C= Candidate

XN = Experimental Population

Animals

Beetle, American burying (E)

Beetle, salt creek tiger (E)

Crane, whooping (E)

Curlew, Eskimo (E)

Ferret, black-footed (E)

Mussel, scaleshell (E)

Plover, piping (T)

Shiner, Topeka (E)

Sturgeon, shovelnose (P)

Sturgeon, pallid (E)

Tern, interior least (E)

Wolf, gray (E)

Plants

Butterfly plant, Colorado (T)

Penstemon, blowout (T)

Orchid, western prairie fringed (T)

Ladies'-tresses, Ute (T)

Federally Designated Critical Habitat: Crane, whooping and Shiner, Topeka

Federally Proposed Critical Habitat: None

State Species of Concern

Animals

Chub, Sturgeon
